Policing Provincial England 1829 1856:

Policing Provincial England, 1829-1856 David Philips, 1999 *Crime in England 1688-1815* David Cox, 2014-04-24 *Crime in England 1688 1815* covers the long eighteenth century a period which saw huge and far reaching changes in criminal justice history These changes included the introduction of transportation overseas as an alternative to the death penalty the growth of the magistracy the birth of professional policing increasingly harsh sentencing of those who offended against property owners and the rapid expansion of the popular press which fuelled debate and interest in all matters criminal Utilising both primary and secondary source material this book discusses a number of topics such as punishment detection of offenders gender and the criminal justice system and crime in contemporaneous popular culture and literature This book is designed for both the criminal justice history criminology undergraduate and the general reader with a lively and immediately approachable style The use of carefully selected case studies is designed to show how the study of criminal justice history can be used to illuminate modern day criminological debate and discourse It includes a brief review of past and current literature on the topic of crime in eighteenth century England and Wales and also emphasises why knowledge of the history of crime and criminal justice is important to present day criminologists Together with its companion volumes it will provide an invaluable aid to both students of criminal justice history and criminology *The New Police in the Nineteenth Century* Paul Lawrence, 2017-07-05 The period 1829 1856 witnessed the introduction of the New Police to Great Britain and Ireland Via a series of key legislative acts traditional mechanisms of policing were abolished and new supposedly more efficient forces were raised in their stead Subsequently the introduction of the New Police has been represented as a watershed in the development of the systems of policing we know today But just how sweeping were the changes made to the maintenance of law and order during the nineteenth century The articles collected in this volume written by some of the foremost criminal justice historians show a process which while cumulatively dramatic was also at times protracted and acrimonious There were significant changes to the way in which Britain and Ireland were policed during the nineteenth century but these changes were by no means as straightforward or as progressive as they have at times been represented

Crime Control and Everyday Life in the Victorian City David Churchill, 2017-12-29 The history of modern crime control is usually presented as a narrative of how the state wrested control over the governance of crime from the civilian public Most accounts trace the decline of a participatory discretionary culture of crime control in the early modern era and its replacement by a centralized bureaucratic system of responding to offending The formation of the new professional police forces in the nineteenth century is central to this narrative henceforth it is claimed the priorities of criminal justice were to be set by the state as ordinary people lost what authority they had once exercised over dealing with offenders This book challenges this established view and presents a fundamental reinterpretation of changes to crime control in the age of the new police It breaks new ground by providing a highly detailed empirical analysis of everyday crime control in Victorian

provincial cities revealing the tremendous activity which ordinary people displayed in responding to crime alongside a rich survey of police organization and policing in practice With unique conceptual clarity it seeks to reorient modern criminal justice history away from its established preoccupation with state systems of policing and punishment and move towards a more nuanced analysis of the governance of crime More widely the book provides a unique and valuable vantage point from which to rethink the role of civil society and the state in modern governance the nature of agency and authority in Victorian England and the historical antecedents of pluralized modes of crime control which characterize contemporary society ,

Leading the Police Kim Stevenson,David Cox,Iain Channing,2018-03-12 In 2015 the College of Policing published its Leadership Review with specific reference to the type of leadership required to ensure that the next generation of Chief Constables and their management approach will be fit for purpose Three key issues were highlighted as underpinning the effective leadership and management of contemporary policing hierarchy culture and consistency Yet these are not just relevant to modern policing having appeared as constant features implicitly and explicitly since the creation of the first provincial constabularies in 1835 This collection reviews the history of the UK Chief Constable reflecting on the shifts and continuities in police leadership style practice and performance over the past 180 years critiquing the factors affecting their operational management and how these impacted upon the organization and service delivery of their forces The individuality of Chief Constables significantly impacts on how national and local strategies are implemented shaping relationships with their respective communities and local authorities Importantly the book addresses not just the English experience but considers the role of Chief Constables in the whole of the United Kingdom highlighting the extent to which they could exercise autonomous authority over their force and populace The historical perspective adopted contextualises existing considerations of leadership in modern policing and the extensive timeframe and geographical reach beyond the experience of the Metropolitan force enables a direct engagement with contemporary debates It also offers a valuable addition to the existing literature contributing to the institutional memory of UK policing The contributors represent a range of disciplines including history law criminology and leadership studies and some also have practical policing experience The Making of the Modern Police, 1780-1914, Part I Vol 2 Paul Lawrence,Francis Dodsworth,Robert M Morris,2021-12-24 Over six volumes this edited collection of pamphlets government publications printed ephemera and manuscript sources looks at the development of the first modern police force It will be of interest to social and political historians criminologists and those interested in the development of the detective novel in nineteenth century literature This Volume II of Part One **Law and Society in England 1750-1950** William Cornish,Stephen Banks,Charles Mitchell,Paul Mitchell,Rebecca Probert,2019-10-31 **Law and Society in England 1750-1950** is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state In this new updated edition the authors explore the complex relationship between legal and social change They consider the ways in which those in power themselves imagined and

initiated reform and the ways in which they were obliged to respond to demands for change from outside the legal and political classes. What emerges is a lively and critical account of the evolution of modern rights and expectations and an engaging study of the formation of contemporary social administrative and legal institutions and ideas and the road that was travelled to create them. The book is divided into eight chapters: Institutions and Ideas; Land; Commerce and Industry; Labour Relations; The Family; Poverty and Education; Accidents and Crime. This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law, political science and social history.

A History of Drink and the English, 1500-2000 Paul Jennings, 2016-02-05. A 2017 CHOICE Outstanding Academic Title award winner. This book is an introduction to the history of alcoholic drink in England from the end of the Middle Ages to the present day. Treating the subject thematically, it covers who drank, what they drank, how much, who produced and sold, drink, the places where it was enjoyed and the meanings which drinking had for people. It also looks at the varied opposition to drinking and the ways in which it has been regulated and policed. As a social and cultural history, it examines the place of drink in society and how social developments have affected its history and what it meant to individuals and groups as a cultural practice. Covering an extended period in time, this book takes in the important changes brought about by the Reformation and the processes of industrialization and urbanization. This volume also focuses on drink in relation to class and gender and the importance of global developments along with the significance of regional and local difference. Whilst a work of history, it draws upon the insights of a range of other disciplines which have together advanced our understanding of alcohol. The focus is England, but it acknowledges the importance of comparison with the experience of other countries in furthering our understanding of England's particular experience. This book argues for the centrality of drink in English society throughout the period under consideration, whilst emphasizing the ways in which its use, abuse and how they have been experienced and perceived have changed at different historical moments. It is the first scholarly work which covers the history of drink in England in all its aspects over such an extended period of time. Written in a lively and approachable style, this book is suitable for those who study social and cultural history as well as those with an interest in the history of drink in England.
