## **Policing Urban Poverty:**

**Policing Urban Poverty** Chris Crowther, 2000 Policing Urban Poverty provides a comprehensive and wide ranging analysis of the policy implications of social problems for the welfare state in general and the police service in particular through an examination of the relationship between discourses on urban poverty crime and disorder in Britain and America Drawing on extensive empirical evidence the book adds to the sociological and historical analyses of these issues by considering their practical relevance at different times and in different places for police policy makers Throughout history the police have been charged with the difficult task of peace keeping and crime fighting in poor communities with potentially calamitous consequences when things go wrong Senior police officers have argued that successive governments have not provided adequate support and guidance to assist them in their attempts to be tough on crime and its causes Policing Urban Poverty C. Crowther, 1999-12-08 Policing Urban Poverty demonstrates that since the nineteenth century a core task of the police has been crime control and order maintenance especially in poor communities This illuminating book focuses on the policy implications of discourses on poverty and crime in America and Britain It draws on sociological theory and extensive empirical evidence which show that in recent history senior police policy makers have been involved in a struggle with their political masters in determining the most judicious means to tackle urban poverty and crime *The Politics of the Urban Poor in Early Twentieth-Century India* Nandini Gooptu, 2001-07-05 Nandini Gooptu s magisterial 2001 history of the labouring poor in India represents a tour de force **Police Culture in a Changing World** Bethan Loftus, 2012-01-19 This fascinating new title offers an ethnographical investigation of contemporary police culture based on extensive field work across a range of ranks and units in the UK s police force By drawing on over 600 hours of direct observation of operational policing in urban and rural areas and interviews with over 60 officers the author assesses what impact three decades of social economic and political change have had on police culture She offers new understandings of the policing of ethnicity gender and sexuality and the ways in which reform initiatives are accommodated and resisted within the police The author also explores the attempts of one force to effect cultural change both to improve the working conditions of staff and to deliver a more effective and equitable service to all groups in society Beginning with a review of the literature on police culture from 30 years ago the author goes on to outline the new social economic and political field of contemporary British policing Taking this as a starting point the remaining chapters present the main findings of the empirical research in what is a truly comprehensive analysis of present day policing culture *Reducing Urban Poverty in the Global South* David Satterthwaite, Diana Mitlin, 2013-08-15 Urban areas in the Global South now house most of the world s urban population and are projected to house almost all its increase between now and 2030 There is a growing recognition that the scale of urban poverty has been overlooked and that it is increasing both in numbers and in the proportion of the world s poor population that live and work in urban areas This is the first book to review the effectiveness of different approaches to reducing urban

poverty in the Global South It describes and discusses the different ways in which national and local governments international agencies and civil society organizations are seeking to reduce urban poverty Different approaches are explored for instance market approaches welfare rights based approaches and technical professional support The book also considers the roles of clientelism and of social movements Case studies illustrate different approaches and explore their effectiveness Reducing Urban Poverty in the Global South also analyses the poverty reduction strategies developed by organized low income groups especially those living in informal settlements It explains how they and the federations or networks they have formed have demonstrated new approaches that have challenged adverse political relations and negotiated more effective support Local and national governments and international agencies can become far more effective at addressing urban poverty at scale by as is proposed in this book working with and supporting the urban poor and their organizations This book will be an invaluable resource for researchers and postgraduate students in urban development poverty reduction urban geography and for practitioners and organisations working in urban development programmes in the Global South

**Democracy, Revolution and Geopolitics in Latin America** Luis Fernando Angosto-Ferrandez, 2013-11-12 Hugo Chavez won re election in the 2012 Venezuelan presidential election despite a closer margin between candidates than in previous elections The

results were puzzling for those who believed that Chávez's government had long ago reached its limits while Chávez's supporters were struck by the growth of the opposition vote. Thus understanding the Venezuelan election of 2012 has proved to be challenging with various recent studies focused upon it. Luis F. Angosto Ferrández's book advances two ideas not previously discussed: the relationship between electoral behavior in Venezuela and contemporary Latin American geopolitics and the way that relationship is projected through the candidates' appeal to narratives that situate Venezuela at the core of a heroic Latin American tradition and of a new regional process of integration. This edited volume first contextualizes and explains the results of the last re-election of Hugo Chávez in terms of its geopolitical conditionings and implications. Contributors tackle Latin American geopolitics by analyzing Venezuelan foreign policy and the country's role in continental projects of supra-national integration. Contributors also examine electoral strategy and tactics in order to show how the two main candidates built their campaign on emotional grounds as much on rational ones. This will be connected to the investigation of new narratives of national identification in contemporary Venezuela and how they may have practical implications in the design of policies addressing issues such as indigenous rights, community media and national security. Compiling state-of-the-art research on Latin American and Venezuelan politics, this book will appeal to academics and professionals who specialize in Latin American studies, international relations, democracy and indigenous peoples.
