Policy Expertise in Contemporary Democracies Dr Stephen Brooks, Ms Dorota Stasiak, Professor Tomasz Zyro, 2013-02-28 In the world of Wikipedia blogging and citizen journalism where huge masses of information and the capability to disseminate opinions thoughts and ideas is available at the click of a mouse what is the role and impact of political experts The contributors to this insightful and original volume argue that across the western world in general the political expert occupies as important a role today as at any time in the past The ubiquity of information and the fact that the experts and the organizations to which they are affiliated may be viewed as having an ideological agenda has not diminished their role influence or status Governments and the media still rely on them for information and advice whilst organizations in civil society need them in order to provide the evidence arguments and policy recommendations that are essential to having a voice in the public conversation By examining how these policy experts and their think tanks continue to exert influence across a range of modern western democracies a better understanding of the role of policy expertise and an examination of how it may develop and evolve throughout the rest of the world is reached

The Politics of Expertise in China Xufeng Zhu, 2018-10-26 Since the reform and opening up policy was implemented in China consultations have been increasingly carried out during the policy making process This often involves experts many of whom are based in think tanks or similar institutions The degree of access to the policy making process varies and consequently some experts influence the policy making process significantly and others not This book explores how experts in China engage with the policy making process and the circumstances which affect how far they are able to influence policy making

Experts Steven Brint, 2020-06-30 Since the 1960s the number of highly educated professionals in America has grown dramatically During this time scholars and journalists have described the group as exercising increasing influence over cultural values and public affairs The rise of this putative new class has been greeted with idealistic hope or ideological suspicion on both the right and the left In an Age of Experts challenges these characterizations showing that claims about the distinctive politics and values of the professional stratum have been overstated and that the political preferences of professionals are much more closely linked to those of business owners and executives than has been commonly assumed

The Political Economy of Expertise Kevin Esterling, 2009-12-10 The Political Economy of Expertise is a carefully argued examination of how legislatures use expert research and testimony Kevin Esterling demonstrates that interest groups can actually help the legislative process by encouraging Congress to assess research and implement well informed policies More than mere touts for the interests of Washington insiders these groups encourage Congress to enact policies that are likely to succeed while avoiding those that have too great of a risk of failure The surprising result is greater legislative efficiency The Political Economy of Expertise illustrates that this system actually favors effective and informed decision making thereby increasing the likelihood that new policies will benefit the American public Kevin M Esterling is Assistant Professor at the University of California Riverside
