Political communication today: challenges and threats

Abstract

Events such as the triumph of Brexit in the United Kingdom, the victory of Donald Trump in the United States or the rise of populism in some European countries have resulted in a significant upheaval in the western political scenario, which had remained stable since the Second World War. These events have opened up new and relevant avenues for political communication. This discipline is facing important challenges and threats, from the academic and political action points of view. New phenomena, such as the loss of credibility of political actors and of the traditional means of communication, the trivialisation of politics, the use of algorithms to understand, anticipate and intervene in the development of communication or the rise of the new media in the public arena are being combined with old acquaintances such as persuasion, propaganda, customisation and mastering emotions. This article explores new lines of work, prospects, strategies and positioning and furthermore reflects on the possibilities offered by them for establishing future theoretical, methodological and action paths within a communicative realm characterised by its ongoing evolution within an increasingly uncertain and changing context.

1. Introduction

In recent years, western democracies have experienced very surprising events that apparently contradict the electoral logic known until then. Situations such as the rejection by referendum of a peace agreement with the FARC guerrillas in Colombia, the victory of Brexit in Great Britain, the unexpected triumph of Donald Trump in the United States or the rise of the populist parties in several European countries, have highlighted the role of political communication and its effect on citizenry. Tension prevails and the current discussion is about the extent to which political communication and media language (as a reflection and expression of reality) can contribute to the necessary democratic dialogue and recovery of confidence, participation and understanding between politicians and voters, governments and citizens.

Islam-Oriented Parties'

Ideologies and Political Communication in the Quest for Power in Morocco Driss Bouyahya, 2015-10-28 The twentieth century saw the rapid rise of groups of Muslims who use Islam as an ideological weapon for their political ends. This is commonly referred to in scholarly and media writings as Islamism and its proponents are designated as Islamists, not Muslims, in order to stress that they are attributing an ideological dimension to Islam. There are many Islam-oriented groups, but as might be expected, the use of scriptural language is a common characteristic of their rhetoric. For instance, they all use scriptural references as an immutable source of authority in the social, ethical, and political spheres. While they do not always share the same strategies and goals, these groups nevertheless resort to the same sources of authority and deploy similar terms of reference. Unlike some Islam-oriented parties, the Party of Justice and Development (PJD) in Morocco does not focus on commonly used precepts such as *madawiyya* (a return to Islamic principles), *shumuliyya* (a comprehensive application of Islam in all spheres of life), and *al da'awa al nidaliyya* (a call for struggle to bring about the Islamization of both state and society). Over recent decades, there has been an increasing presence of mass Islam-oriented movements and parties with an important role in national politics. The PJD represents a good regional sample for measuring the impact of different internal politics and political contexts on Islam-oriented political movements and parties, ideological orientations, and political communication in Morocco. This book explores the PJD's political ideologies since its re-emergence under its current name and investigates the factors which shape its political ideologies. In addition, it examines the party's political communication and uncovers its use of communication technology, particularly the Internet, in its political advertising strategies.
