Transforming Asian Governance M Ramesh, Scott Fritzen, 2009-01-13 There are a multitude of hazards that confront attempts to change institutional or political orders in pursuit of good governance Even seemingly technical prescriptions run up against local political and social realities which make their adoption difficult and if adopted require significant modification of the original prescriptions Moreover the technical rationalist and or normative language employed in the good governance discourse masks contests over power rights resources and actors conflicting interests There is a definite need to situate the good governance debate in the local context rather than reflexively adopting a universalistic positing of the fact or desirability of governance convergence across countries and sectors because the reality is that the world wide deployment of good governance rhetoric is not accompanied by convergence in thinking or practices across nations Transforming Asian Governance asks How do good governance principles translate into local settings How do local settings influence the conception of what is good governance and how the debate over good governance is deployed as a political or administrative strategy Using case studies in governance from Thailand the Philippines Pakistan Malaysia India Indonesia Korea and Japan this book will be essential reading for anyone interested in the public and social policy of Asia and international and comparative governance more generally
