Political Journalism New Challenges New Practices:

Political Journalism Raymond Kuhn, Erik Neveu, 2002 This topical collection examines the changing role of political journalism in the era of the soundbite and the spin doctor Topics covered include the manipulation of journalists by politicians and vice versa Myth and Reality of the Legitimacy Crisis Carolien van Ham, Jacques Thomassen, Kees Aarts, Rudy Andeweg, 2017-07-14 Theories about the decline of legitimacy or a legitimacy crisis are as old as democracy itself Yet representative democracy still exists and the empirical evidence for a secular decline of political support in established democracies is limited questionable or absent This lack of conclusive evidence calls into question existing explanatory theories of legitimacy decline How valid are theories of modernization globalization media malaise social capital and party decline if the predicted outcome i e secular decline of political support does not occur And which new explanations can account for the empirical variation in political support in established democracies This book systematically evaluates the empirical evidence for legitimacy decline in established democracies the explanatory power of theories of legitimacy decline and promises new routes in investigating and assessing political legitimacy In doing so the book provides a broad and thorough reflection on the state of the art of legitimacy research and outlines a new research agenda on legitimacy **The Handbook of Political Sociology** Thomas Janoski, Robert R. Alford, Alexander M. Hicks, Mildred A. Schwartz, 2005-05-23 This Handbook provides a complete survey of the vibrant field of political sociology Part I explores the theories of political sociology Part II focuses on the formation transitions and regime structure of the state Part III takes up various aspects of the state that respond to pressures from civil society **An Introduction to Political Communication** Brian McNair, 2003 An Introduction to Political Communication explores the relationship between politics the media and democracy in the United Kingdom the United States and other contemporary societies In this textbook Brian McNair examines how politicians trade unions pressure groups non governmental organisations and terrorist organisations make use of the media Separate chapters look at political media and their effects the work of political advertising marketing and public relations and the communication practices of organisations at all levels from grassroots campaigning through to governments and international bodies Recent developments covered in the new edition includes the re election of New Labour in 2001 the changes in government information and communication policy introduced by the Blair administration since 1997 the 2000 election of George W Bush in the United States the NATO interventions in Kosovo and the former Yugoslavia the implications for international political communication of September 11 the emergence of Al Quaida and the war on terror *Popular Newspapers, the Labour Party and British Politics* James Thomas, 2007-05-07 IT S THE SUN WOT WON IT was the famous headline claim of Britain s most popular newspaper following the Conservative party s victory over Labour in the 1992 general election The headline referred to a virulent press campaign against Neil Kinnock s Labour party and dramatically highlighted one of the chief features of British politics during the twentieth century the conflict between a socialist Labour

party and a capitalist popular press Labour's frequent complaints of the political and electoral unfairness of newspaper bias meant that some commentators considered that this dispute had a heritage as old as the party itself Others including the Labour leadership at the time argued that despite past tensions the 1992 election marked the culmination of an unprecedented campaign of vilification against the party Popular Newspapers the Labour Party and British Politics assesses these competing claims looking not only at 1992 but both back and forward to examine the continuities and changes in newspaper coverage of British politics and the Labour party over the twentieth century The book explores whether the popular press has lived up to its claim of being a democratic fourth estate or has merely as Labour politicians have argued been a powerful fifth column distorting the democratic process Drawing on a range of previously unexamined sources this book offers the first original and comprehensive history of a fascinating aspect of British politics from Beaverbrook to Blair James Thomas is a lecturer at the Cardiff School of Journalism Media and Cultural Studies at Cardiff University and has published articles and essays exploring the relationship between the popular press and British politics

Voters or Consumers Darren Lilleker, Richard Scullion, 2009-05-05 This edited collection seeks to map current thinking and practice in order to assess the extent to which the consumer as opposed to the voter should now be elevated to a central position within our understanding of the relationship between the public and political spheres The volume will firstly offer an overview of how consumerism has been applied to our understanding of political and voter behaviour so outlining the book's key concepts The volume then follows a processual approach to developing its analysis offering essays that explore contrasting critical perspectives on the topic The group of essays focus on conceptualising political consumerism the next look at how political organisations use the tools of positioning and branding so developing an overview of consumer driven political behaviour The focus then moves to the nature of political communication both by parties and the media and how this reflects the neo liberal ontological perspective that encourages voting to be treated as part of consumer behaviour Finally the book turns to the voter consumer looking firstly at the processing of messages and how this can be analysed from a consumerist perspective and finally on voting behaviour itself exploring the extent to which rational choice and economic models of voting have been increasingly a reflection of a consumerist perspective Each chapter will approach the subject from a discrete perspective which will be outlined within its introduction However the chapters will each explore the following Whether parties or voters are approaching one another using consumerist perspectives How this can be mapped empirically through specific examples or case studies The extent to which consumer behaviour models and perspectives help us understand voter or party behaviour
