Business Strategy Kamel Mellahi, Klaus Meyer, Rajneesh Narula, Irina Surdu, Alain Verbeke, 2021 Multinational enterprises must contend with increasingly challenging conditions in the international business environment This Handbook explores how classic principles of international competitive strategy are transformed in today's markets and provides suggestions on how firms can develop effective strategies to respond to these transformations **The Circular Structure of Power**

Torben Bech Dyrberg, 1997 Few concepts in social theory have been used so extravagantly in recent years as the notion of power Yet despite its inflated presence the term is still unclear and undertheorized In The Circular Structure of Power Torben Dyrberg rises to the challenge of conceptualizing power through a philosophical examination of its uses in contemporary social theory Drawing on the insights of Michel Foucault Ernesto Laclau and Chantal Mouffe Dyrberg brings this continental tradition into a creative dialogue with the Anglo American tradition represented by figures such as Steven Lukes William Connolly Peter Bachrach and Morton Baratz Moreover Dyrberg moves from such abstract considerations to

their implications for political and democratic theory through an examination of the work of thinkers as diverse as Robert Dahl, John Rawls, Jürgen Habermas and Nicos Poulantzas. Simultaneously engaging with and defying many of the dominant definitions of power, Torben Dyrberg destabilizes and undermines the conventional distinctions and polarities through which power is usually understood. The new perspective offered to us by this investigation is one which goes beyond the assumption that power can be based on and derived from either agency or structure as if these categories themselves were not somehow constituted by power.

Psychological Warfare in Political Campaigns Kunal Deshpande, 2025-02-20

Psychological Warfare in Political Campaigns explores the intricate world of political influence focusing on psychological strategies used in both warfare and democratic processes. Tailored for a global audience, particularly readers in the United States, we provide a nuanced understanding of how psychological tactics shape public opinion and decision making. We examine the foundational principles of psychological warfare, tracing its historical roots and contemporary applications. From ancient civilizations to modern conflicts, we illuminate the evolution and relevance of psychological tactics in shaping narratives and perceptions. Central to our discussion is the exploration of persuasion techniques deeply ingrained in political campaigning. Through an analysis of cognitive biases and persuasive communication strategies, we unveil the mechanisms behind effective messaging and voter mobilization. A significant portion of our book dissects propaganda techniques particularly relevant in an era dominated by digital media and information warfare. We equip readers with tools to recognize and counter various forms of propaganda. We also delve into the role of social media in amplifying psychological operations, exploring how platforms like Facebook, Twitter, and YouTube manipulate public opinion and sow discord. While much of our discourse focuses on the civilian sphere, we also examine the use of psychological operations in military contexts. From influencing enemy morale to shaping battlefield perceptions, we provide an overview of strategies employed by military forces to achieve psychological dominance.
