Political Systems, Structures, and Functions Britannica Educational Publishing,2012-06-01 Governance is a complex process often divided among various structures and institutions Local regional national and even supranational entities each have their own formal and informal institutions that comprise a political system Readers will use this comprehensive volume to examine the various types structures and functions of government around the world as well as the evolution of political systems and the factors contributing to their rise and fall Democratic and Authoritarian Political Systems in 21st Century World Society Anna L. Ahlers,Damien Krichewsky,Evelyn Moser,Rudolf Stichweh,2021-03-05 This book is about the radical novelty of modern polities in a functionally differentiated world society Premodern states were at the apex of a stratified hierarchical society They dominated society and all its groups and strata Modern polities have to be understood through the ecology of relations among different function systems They have to find and incessantly redefine their place in society They produce decisions that are collectively binding but in preparing these decisions experience constraints and knowledge deficiencies that are related to the complexity of a functionally differentiated society The book concentrates on six analytical perspectives that reflect how modern polities are embedded into 21st century society These perspectives are the concept of inclusion and the inclusion revolution constitutive of modern polities the internal differentiation of polities that endows them with an unprecedented complexity the fact that polities do not know anything about society and the ways in which they compensate for this representation and responsiveness as strategies to reconnect with society the self restriction of some polities that brings about ever new autonomous expert organizations the symmetrical rise of autocracies and democracies as the two modern variants of political regimes **World Political Systems after Polarity** Nerses Kopalyan,2017-06-14 What will the current global political order look like when American unipolarity ends Historically the power configurations of world political systems have been defined by four structures multipolarity tripolarity bipolarity and unipolarity These concepts inform both the formulation and the analysis of short term policies and long term grand strategies of powerful actors in the world political order and may be of profound importance to the future peace and stability of the global system The concept of nonpolarity however has never been addressed as a possible or a potential structural formulation in the nomenclature of global political systems This book provides a coherent conceptualization of nonpolarity and how diplomacy will operate in a more collective age and fits into the ongoing discussion about the nature of the political world order as we approach the end of the American century **Political Systems of the World** Marshall Cavendish Corporation,Tom Lansford,Ron Fridell,Rebecca Steffoff,Thomas Fleming,Lila Perl,2007-09 **Immigration and Perceptions of National Political Systems in Europe** Lauren M. McLaren,2015 Immigration has become one of the most pressing political issues of the modern day and public opinion polls indicate that it has been of public concern for some time This book analyses the impact

of immigration on perceptions of national political systems in Europe and contends that public concern about immigration is undermining trust in national political institutions and elites as well as satisfaction with the way democracy is working

Immigration and Perceptions of National Political Systems in Europe contends that immigration presents more substantial challenges to some national identity constructions and that while national identity in general can help to bolster support for national political systems those who emphasize lengthy ties to the country are likely to be less positive about their national political systems particularly when these allow for relatively easy immigrant incorporation This book also includes an analysis of the impact of concern about immigration on the British political system and shows that while concern about immigration appears to have been fairly high since the 1960s it is only in since 1997 that such concern has come to translate into negative perceptions of the British political system
