Political Change In South Asia:

Political Change in South-East Asia Michael R.J Vatikiotis, 2005-06-21 Political Change in South East Asia takes up the debate between those who resist the pressure for democracy and point to unchanging Asian values and those who believe that the appeal of democracy is universal The author examines the case for both sides and concludes that the strong state will be a fixture of South East Asian politics for some considerable time to come Increasingly close links between the ten states of South East Asia are likely to reinforce perceptions of a common culture and in the end put up more effective defences against external cultural influence

Parties and Political Change in South Asia James Chiriyankandath, 2016-04-14 Over the past seven decades and more political parties have become an essential feature of the political landscape of the South Asian subcontinent serving both as a conduit and product of the tumultuous change the region has experienced Yet they have not been the focus of sustained scholarly attention This collection focuses on different aspects of how major parties have been agents of and subject to change in three South Asian states India Pakistan and Sri Lanka examining some of the apparent paradoxes of politics in the subcontinent and covering issues such as gender religion patronage clientelism political recruitment and democratic regression Recurring themes are the importance of personalities and the corresponding neglect of institutionalisation and the lack of pluralism in intraparty affairs factors that render parties and political systems vulnerable to degeneration This book was published as a special issue of Commonwealth and Comparative Politics

The Media and Political Change in Southeast Asia Jonathan Woodier, 2009-01-01 the book is in a comprehensive readable format the book is logically organised rich in data and statistics regarding the issues that it covers as well as accessibly written such that its points would not be lost on the average upper level undergraduate student with some preparation in Asian studies and the social sciences Jane M Ferguson South East Asia Research a serious academic work that should be on the official reading list of every media studies course Chris Roberts Presenter Sky News Jonathan Woodier has written an excellent book on the politics of media control in Southeast Asia He shows how political elites in the region are using major events such as the 1997 Asian Financial Crisis and the 2001 September 11 terror attacks as well as innovations in media tools such as public relations and the internet to control information flow to their citizens This book is a must read for anyone interested in an explanation why Southeast Asian models of authoritarian models are surviving A brilliant analysis it combines media theory with a critical discussion of contemporary developments in Asia James Gomez Keio University Japan True to the old Chinese adage kill a chicken scare a monkey the few who once challenged Southeast Asia's ruling elites disappeared and the majority were silent Crude but effective Modern times however demand a more sophisticated approach

Ruling elites now strip cultures naked and micro manage people s minds Their preferred tools of penetration and manipulation are a compliant media and a money hungry PR industry Jonathan Woodier s insights will ensure that you will never read a newspaper or watch TV news in quite the same way again Trevor Watson Professional Public Relations Pty Ltd Australia This is an engaging and informative analysis of the media landscape in South East Asia It uncovers the pervasive impact of the global media on the political process and raises important academic and policy issues in the process This book is timely and will be a must read for policymakers academics and students across communications media studies politics and democratization as well as for everyone with an interest in current day developments in South East Asia Joep Cornelissen Leeds University Business School UK Jonathan Woodier s latest work considers what impact the media has upon the democratization process in Southeast Asia Has the media had a liberalizing effect or become subject to elite control in Southeast Asia and if so why What role does the global media play in this process particularly given its conglomerization and commoditization By examining the communications media and its relationship to political change in Southeast Asia this fascinating study will endeavour to provide both a regional comparative analysis and a more balanced interpretation of the mass communication media in the wake of September 11 2001 The book also investigates the durability of authoritarian regimes and the enduring capacity of the media controlled state alongside the growing sophistication of political communications particularly the use of PR consultants The author provides an insider s view with unique insights into the practice of political communication and its development throughout the strategically important region of Southeast Asia with its large Moslem states as well as much further afield to countries such as China and post industrial Europe As such the book will be warmly welcomed by academics of politics international relations media communications and PR It will also appeal to researchers interested in political change the rise of the global media giants and the influence of authoritarian states such as China

Chakravarti,1978 Articles **Political Legitimacy in Southeast Asia** Muthiah Alagappa,1995 Despite the end of the Cold War security continues to be a critical concern of Asian states Allocations of state revenues to the security sector continue to be substantial and have in fact increased in several countries As Asian nations construct a new security architecture for the Asia Pacific region Asian security has received increased attention by the scholarly community But most of that scholarship has focused on specific issues or selected countries This book aims to lay the groundwork for a comprehensive in depth understanding of Asian security by investigating conceptions of security in sixteen Asian countries The book undertakes an ethnographic country by country study of how Asian states conceive of their security For each country it identifies and explains the security concerns and behavior of central decision makers asking who or what is to be protected against what potential threats and how security policies have changed over time This inside out or bottom up approach facilitates both identification of similarities and differences in the security thinking and practice of Asian countries and exploration of their consequences The crucial insights into the dynamics of international security in the region provided by this approach can form the basis for further inquiry including debates about the future of the region
