**The Political Economy of Education** Martin Carnoy, 2024-02-15 The Political Economy of Education provides academically rigorous yet clear explanations of the economics and politics driving today's educational systems and how economists analyze them. The book covers a host of topics central to teaching about education and crucial to educational policy. These include how to use the tools of economic and political theory to take critical measure of education's role in social mobility and economic growth; whether good teachers can overcome social class and race achievement gaps; the effectiveness of early childhood and vocational education; and debates on school accountability and whether increasing spending on schooling improves quality. The book also explores worldwide changes in higher education, especially massification and increased stratification and privatization. Written for upper undergraduate and graduate students in economics, public policy, and education and packed with real world examples, this is an essential text for anyone interested in gaining fresh and international perspectives on education.

*Public Opinion and the Political Economy of Education Policy around the World* Martin R. West, Ludger Woessmann, 2021-04-27 Comparative analyses of the influence of public opinion on education policy in developed countries. Although research has suggested a variety of changes to education policy that have the potential to improve educational outcomes, politicians are often reluctant to implement such evidence-based reforms. Public opinion and pressure by interest groups would seem to have a greater role in shaping education policy than insights drawn from empirical data. The construction of a comparative political economy of education that seeks to explain policy differences among nations is long overdue. This book offers the first comparative inventory and analysis of public opinion and education in developed countries, drawing on data primarily from Europe and the United States.

*The Political Economy of Education* Mark Gradstein, M. Justman, Volker Meier, 2005 The dominant role played by the state in the financing, regulation, and provision of primary and secondary education reflects the widely held belief that education is necessary for personal and societal well-being. The economic organization of education depends on political as well as market mechanisms to resolve issues that arise because of contrasting views on such matters as income inequality, social mobility, and diversity. This book provides the theoretical framework necessary for understanding the political economy of education, the complex relationship of education, economic growth, and income distribution, and for formulating effective policies to improve the financing and provision of education. The relatively simple models developed illustrate the use of analytical tools for understanding central policy issues. After offering a historical overview of the development of public education and a review of current econometric evidence on education.

growth and income distribution the authors lay the theoretical groundwork for the main body of analysis First they develop a basic static model of how political decisions determine education spending then they extend this model dynamically Applying this framework to a comparison of education financing under different regimes the authors explore fiscal decentralization individual choice between public and private schooling including the use of education vouchers to combine public financing of education with private provision and the social dimension of education its role in state building the traditional melting pot that promotes cohesion in a culturally diverse society *Schooling in a Corporate Society* Martin Carnoy,1975 The New Political Economy of Teacher Education Viv Ellis,Lauren Gatti,Warwick Mansell,2024-01-30 Viv Ellis Lauren Gatti and Warwick Mansell present a unique and international analysis of teacher education policy Adopting a political economy perspective this distinctive text provides a comparative analysis of three contrasting welfare state models the US England and Norway following the 2008 Global Financial Crisis GFC Arguing that a new political economy of teacher education began to emerge in the decade following the GFC the authors explore key concepts in education privatisation and examine the increasingly important role of shadow state enterprises in some jurisdictions This topical text demonstrates the potential of a political economy approach when analysing education policies regarding pre service teacher education and continuing professional development
