

Define: Political Economy

Obviously, power and authority come to the fore when heterogeneity of interest leads to conflict among actors and does not necessarily lead to optimal use of scarce resources.

Today, political economists study interrelationships between political and economic institutions (or forces) and processes. They appreciate politics as the sum of activities—involving cooperation, conflict, and negotiation—that shape decisions touching the production, consumption, and transfer of scarce resources, irrespective of whether the activities are formal or informal, public or private, or a combination thereof.

The Child in International Political Economy Alison M.S. Watson, 2008-12-11 This pioneering volume argues for the inclusion of children and the structure known as childhood as a permanent social category worthy of continued study within the discipline of international political economy IPE Fundamentally and very simply IPE is concerned with the dynamics of interaction across the economic and political domains the relationship between the domestic and the international levels of analysis and the role of the state This book presents a convincing argument for the discussion of children within each of these areas This volume provides the first book length examination of the child within IPE draws on work from a variety of disciplines brings rich analyses to debates about the role of the child in society Contributing insights that may be fundamental to the development of IPE as a discipline The Child in International Political Economy will be vital reading to students and scholars of IPE Childhood Studies and International Relations **The Journal of Political Economy**, 2007

Essays in Economic Globalization, Transnational Policies and Vulnerability Alexander Kouzmin, Andrew Hayne, 1999 The liberalization of trade and its questionable benefit the increasing fluidity in the movement of people and trade across geo political divides the emergence of unregulated virtual trade and its implications on domestic economic policy and the social implications of the new world order are all issues demanding on going critical examination from a perspective beyond the common lens of neo liberal economics Such an examination is pursued in Kouzmin and Hayne edited volume *Essays in Economic Globalization Transnational Policies and Vulnerability* a collection of 13 diverse challenging and often cautionary chapters contributed by an international cohort of scholars **The Political Economy of Reform in Central Asia** Martin C. Spechler, 2008-04-23 This book examines the economic reforms and material progress of the Central Asian republics after becoming independent from the Soviet Union focusing especially although not exclusively on the largest of these new states Uzbekistan It considers the region s abundant energy resources and prospects for future development Capitalism in the Age of Globalization Samir Amin, 1997-02-15 This is an analysis of the increasingly differentiated regions of the South the former Eastern bloc countries and Western Europe The author integrates his economic arguments about the nature of the crisis with political arguments based on his vision of human history as the product of social response to material realities The book analyzes the rise of ethnicity and fundametalism and deconstructs the Bretton Woods institutions notably the IMF and the World Bank as managerial mechanisms proptecting the profitability of capital *The Political Economy of Megaprojects in Asia* Hyun Bang Shin, Dong-Wan Gimm, 2025-02-18 This book offers a comprehensive analysis of how the developmental goals of Asian states are reflected in large scale projects and how various actors both realize and challenge these goals The rise of Asian economies has spurred the proliferation of megaprojects through large scale resource mobilization necessitating varying degrees of state intervention Despite neoliberal pressures these projects remain linked to national developmental aspirations driven by domestic transnational or combined pro growth interests and serve multiple political purposes The

book advances the argument that megaprojects embody the dynamics of multiscalar strategic relations that determine the process and outcome of urbanization. These projects create iconic landmarks, new towns, central business districts, and infrastructure showcasing intertwined political and economic interests. By examining contemporary megaprojects in China, South Korea, Taiwan, India, Malaysia, and Turkey, the contributing authors reveal the complexity of urbanizing forces and their multiscalar nature in shaping the built environment and shed light on the intricate interplay of state strategies, economic needs, and sociopolitical forces that influence urban landscapes. This interdisciplinary work provides a nuanced understanding of the political economy underpinning Asian urbanization and contributes to ongoing debates on urban development, state-society relations, and the production of space in the context of globalization. Korea's Quest for Economic Democratization Youngmi Kim, 2017-09-06. This book studies the sources of inequality in contemporary South Korea and the social and political contention this engenders. Korean society is becoming more polarized. Demands for economic democratization and a fairer redistribution of wealth occupy centre stage of political campaigns, debates, and discourse. The contributions offer perspectives on this wide-ranging socio-political change by examining the transformation of organized labour, civil society, the emergence of new cleavages in society, and the growing ethnic diversity of Korea's population. Bringing together a team of scholars on Korea's transition and democratization, the story the book tells is one of a society acutely divided by the neo-liberal policies that accompanied and followed the Asian financial crisis. Taken together, the contributions argue that tackling inequalities are challenges that Korean policy makers can no longer postpone. The solution, however, cannot be imposed once again from the top down but needs to arise from a broader conversation including all segments of Korean society. The book is intended for a readership interested in South Korean politics specifically and global experiences in transition more generally.

A Global Political Economy of Democratisation Alison J. Ayers, 2018-02-13. The late twentieth century is often portrayed as an Age of Democratisation, with democracy heralded as the best of all political systems. Yet democracy has multiple meanings, values, and significances. The start of the twenty-first century has witnessed a massive revival of interest in the meaning and role of democracy, not least as democracy understood in one highly particular sense has been increasingly recognised to be in crisis. This book presents these deliberations in a new light by moving beyond the concept of the sovereign state as the dominant framework of enquiry and by rejecting the primacy of the state and the categorical separation of the domestic and the international. Instead, Ayers elaborates an account of democratisation through the global political economy, encompassing a trenchant critique of mainstream democracy promotion in theory and practice and opening up possibilities for different histories of democratisation, autonomous of the Western liberal and neoliberal project. This innovative work will prove useful to scholars and students in the fields of Politics, Political Economy, International Relations, Development, African Studies.

History Geography and Sociology *Religions in International Political Economy* Sabine Dreher, 2020-07-02 This book shows how religions and their internal struggles shape key actors and processes in the international political economy It highlights how fundamentalist business oriented Christians in the United States were instrumental in the neoliberal turn in US hegemony how Christianity in the form of prosperity religion transformed Latin America and how reactionary religious movements sharpened state competition through illiberal politics in Turkey India and elsewhere But reactionary movements are also confronted by liberationist or more progressive movements such as Islamic feminism that seek to build a more inclusive global economy Religions and their ideas should be seen as a constitutive part of neoliberal globalization and its contestation in IPE *The International Political Economy of Transformation in Argentina, Brazil and Chile Since 1960* E. Pang, 2002-09-06 This book is about how the three most important countries in South America have responded to the challenges of globalization since the mid 1960s the first OPEC price hike the Third World debt crisis leading to the lost decade for the continent and finally bold but often ill planned neo liberal reforms of the 1990s Latin America will experience another cycle of structural changes in the coming decades as the reforms of the 1980s and 1990s failed to produce the desired effects social justice fair income distribution sustainable growth and consolidation of democracy *The Handbook of the Political Economy of Financial Crises* Martin H. Wolfson, Gerald A. Epstein, 2013-01-07 The Great Financial Crisis that began in 2007 reminds us with devastating force that financial instability and crises are endemic to capitalist economies and that it is only strong and dynamically changing financial regulations that can keep the damage caused by these crises within bounds The international financial system and individual national economies including that of the United States are suffering from the aftermath of the worst financial crisis since the Great Depression Economists are struggling to understand the origins and implications of the crisis The Handbook of the Political Economy of Financial Crises uses a political economy theoretical framework to analyze the crisis After an opening chapter that describes the dimensions of the current crisis the next section provides relevant theoretical frameworks Subsequent sections apply these theoretical frameworks to analyze the background dimensions and implications of the crisis for the world economy Leading scholars push forward our understanding of how and why our international and domestic economies are susceptible to financial breakdown and what can be done to mitigate this problem in the future The methodology throughout applies theoretical concepts in the context of an historical and institutional understanding of the real world By emphasizing the historical and institutional aspects of financial crises the authors advance economic knowledge and provide insights into how we can manage our financial system to improve the lives of ordinary people Neoliberal Globalization and Institutional Reform Sadik Ünay, 2006 This book represents the manifestation of a long term effort to explore the multifaceted impact of neo liberal globalisation on institutional reform in the developing world with special reference to the transformation trajectory of State Planning Organisation in Turkey Analytically it strives to locate the in depth analysis of Turkish development planning and the

changing fortunes of the State Planning Organisation within the broader context of the states versus markets debate in the political economy literature in order to assess the technical viability and institutional manifestations of development planning under the profound and ever increasing pressures of globalisation To this end a comparative institutional theoretical framework is adopted which engages critically with the neo classical neo liberal approach to macroeconomic policy making and gauges the potential influence of domestic institutional structures in generating effective responses to changes in global economy
