History of the Progress and Suppression of the Reformation in Italy in the Sixteenth Century Thomas McCrie,2021-03-05

Historical Dictionary of the Reformed Churches Robert Benedetto,Donald K. McKim,2009-10-06 As its name implies the Reformed tradition grew out of the 16th century Protestant Reformation The Reformed churches consider themselves to be the Catholic Church reformed The movement originated in the reform efforts of Huldrych Zwingli 1484 1531 of Zurich and John Calvin 1509 1564 of Geneva Although the Reformed movement was dependent upon many Protestant leaders it was Calvin s tireless work as a writer preacher teacher and social and ecclesiastical reformer that provided a substantial body of literature and an

ethos from which the Reformed tradition grew Today the Reformed churches are a multicultural multiethnic and multinational phenomenon The second edition of the Historical Dictionary of the Reformed Churches contains information on the major personalities events facts movements and beliefs of the Reformed churches This is done through a list of acronyms and abbreviations a chronology an introductory essay appendixes a bibliography and over 800 cross referenced dictionary entries on leaders personalities events facts movements and beliefs of the Reformed churches 'Race Is Everything' David Bindman,2023-07-17 A timely and revealing look at the intertwined histories of science art and racism Race Is Everything explores the spurious but influential ideas of so called racial science in the nineteenth and the first half of the twentieth centuries and how art was affected by it David Bindman looks at race in general but with particular concentration on attitudes toward and representations of people of African and Jewish descent He argues that behind all racial ideas of the period lies the belief that outward appearance and especially skull shape as studied in the pseudoscience of phrenology can be correlated with inner character and intelligence and that these could be used to create a seemingly scientific hierarchy of races The book considers many aspects of these beliefs including the skull as a racial marker ancient Egypt as a precedent for Southern slavery Darwin race and aesthetics the purported Mediterranean race the visual aspects of eugenics and the racial politics of Emil Nolde **The Routledge Research Companion to Anglo-Italian Renaissance Literature and Culture** Michele Marrapodi,2019-03-05 The aim of this Companion volume is to provide scholars and advanced graduate students with a comprehensive and authoritative state of the art review of current research work on Anglo Italian Renaissance studies Written by a team of international scholars and experts in the field the chapters are grouped into two large areas of influence and intertextuality corresponding to the dual way in which early modern England looked upon the Italian world from the English perspective Part 1 Italian literature and culture and Part 2 Appropriations and ideologies In the first part prominent Italian authors artists and thinkers are examined as a direct source of inspiration imitation and divergence The variegated English response to the cultural ideological and political implications of pervasive Italian intertextuality in interrelated aspects of artistic and generic production is dealt with in the second part Constructed on the basis of a largely interdisciplinary approach the volume offers an in depth and wide ranging treatment of the multifaceted ways in which Italy s material world and its iconologies are represented appropriated and exploited in the literary and cultural domain of early modern England For this reason contributors were asked to write essays that not only reflect current thinking but also point to directions for future research and scholarship while a purposefully conceived bibliography of primary and secondary sources and a detailed index round off the volume The Oxford History of Western Music Richard Taruskin,Christopher Howard Gibbs,2019 Takes students beyond the who what and when exploring the how and why behind the story of Western MusicNow in its second edition this text immerses students in the engaging story of the Western musical tradition By emphasizing the connections among works both within cultural eras and across time and place the text goes

beyond a basic retelling of the music s history to build students ability to listen critically to key works The Oxford History of Western Music College Edition is a complete program for building students understanding and appreciation of the classical canon
