Radiation Dosimetry:

Radiation Dosimetry Gerald J. Hine, Gordon L. Brownell, 2013-09-12 Radiation Dosimetry focuses on the advancements processes technologies techniques and principles involved in radiation dosimetry including counters and calibration and standardization techniques The selection first offers information on radiation units and the theory of ionization dosimetry and interaction of radiation with matter Topics include quantities derivable from roentgens determination of dose in roentgens ionization dosimetry of high energy photons and corpuscular radiations and heavy charged particles The text then examines the biological and medical effects of radiation as well as radiation effects in malignant tissues levels of radiation and mechanism of radiation effects on living cells The publication takes a look at ionization chambers Geiger Mueller counters and proportional counters scintillation detectors and photographic film dosimetry Discussions focus on calibration and standardization techniques scintillating materials and their light yield scintillation detector dosimetry of neutrons and the physics of counters The text also ponders on chemical and colorimetric indicators and survey instruments and pocket dosimeters The selection is a dependable reference for readers interested in radiation dosimetry *Concepts of Radiation Dosimetry* Kenneth R. Kase, Walter Ralph Nelson, 1978 This monograph is developed from a set of notes which accompanied a seminar series on the Concepts of Radiation Dosimetry given by the authors at Stanford University Introduction to Radiological Physics and Radiation Dosimetry Frank H. Attix, 1986 A straightforward presentation of the broad concepts underlying radiological physics and radiation dosimetry for the graduate level student Covers photon and neutron attenuation radiation and charged particle equilibrium interactions of photons and charged particles with matter radiotherapy dosimetry as well as photographic calorimetric chemical and thermoluminescence dosimetry Includes many new derivations such as Kramers X ray spectrum as well as topics that have not been thoroughly analyzed in other texts such as broad beam attenuation and geometrics and the reciprocity theorem Subjects are layed out in a logical sequence making the topics easier for students to follow Supplemented with numerous diagrams and tables *Sources, Fields, Measurements, and Applications* Frank H. Attix, Eugene Tochilin, 2013-10-22 Radiation Dosimetry Second Edition VOLUME III Sources Fields Measurements and Applications covers the significant aspects of radiation dosimetry The book discusses dosimetry relating to x rays and teleisotope gamma rays discrete and distributed alpha beta and gamma ray sources electron beams and heavy charged particle beams The text also describes dosimetry relating to reactors neutron and mixed n gamma fields neutrons from accelerators and radioactive sources initial and residual ionizing radiation from nuclear weapons natural and man made background radiation radiation in space ultra high energy radiation and uncommon types of particles Dosimetry relating to health physics diobiology radiotherapy implant and intracavitary therapy transition zones especially at bone tissue interfaces and radiation processing is also considered Physicists biophysicists and people involved in radiological science will find the book invaluable Techniques of Radiation Dosimetry K. Mahesh, D. R. Vij, 1985 In planning of the book

we had set out a goal in that the authors of various chapters should not only be the working specialists in their respective areas but equally importantly also belong to institutions and laboratories located in as many countries as possible It was thought that this approach will enable the book to reflect state of art at the back of different dosimetric techniques at a truly international level

Radiation Dosimetry Instrumentation and Methods Gad Shani, 2000-12-28 Radiation dosimetry has made great progress in the last decade mainly because radiation therapy is much more widely used Since the first edition many new developments have been made in the basic methods for dosimetry i e ionization chambers TLD chemical dosimeters and photographic films Radiation Dosimetry Instrumentation and Methods Second Edition brings to the reader these latest developments Written at a high level for medical physicists engineers and advanced dosimetrists it concentrates only on evolvement during the last decade relying on the first edition to provide the basics

Ionizing Radiation Dosimetry Paul R. Martin, 1994

Radiation Dosimetry C.G. Orton, 2013-06-29 Mankind has evolved in a sea of radiation We have been bombarded constantly by X rays y rays UV rays and particulate radiations from outer space and by terrestrial radiations from the ground we walk on from our building materials and from our own bodies Recently we have become increasingly subjected to man made radiations especially from the medical and defense industries All of these radiations are capable of affecting us biologically both to our benefit and to our detriment This book provides a thorough review of the physical and biological dosimetry of these radiations It is targeted to those health professionals who are concerned with understanding the mechanisms fundamental to the biological action of ionizing radiation or who are involved in the application measurement or treatment of the effects of such radiations The first chapter on Bioeffect Dosimetry in Radiation Therapy should be of special interest to anyone involved in the treatment of cancer by radiation It includes a brief review of the history of the

manipulation of time dose parameters in order to improve therapeutic benefit and an up to date analysis of time dose relationships designed for use in fractionated radiotherapy and brachytherapy This is followed by two chapters reviewing and comparing national and international protocols for the precise measurement of photon and electron radiations in therapy These chapters should be invaluable to radiation physicists responsible for treatment machine calibrations
