Radical Agriculture:

Radical Agriculture Richard Merrill, 1976 Radical Agriculture R. Merrill, 1964 **The Social Risks of Agriculture** Ronald C. Wimberley, Craig K. Harris, Joseph J. Molnar, Terry J. Tomazic, 2002-08-30 In a vast society where environmentally conscious nonfarming voters and consumers have grown to greatly outnumber those directly engaged in agriculture what happens in agriculture becomes increasingly subject to control by the general society as policies and laws cater to constituents and consumers This book provides an overview of how Americans perceive and value farmers and examines public opinion with regard to a number of agricultural issues Based on analysis of national survey data the authors offer an empirically based discussion and interpretation of those views and perceptions that help to shape policy and social sustainability This unique collection illustrates that in addition to its natural biological and economic risks agriculture has social risks that reverberate through all levels of society As the general population grows and the number of farms and farmers diminishes the weight of public opinion becomes more important in the policy arena of society as well as in the market demands for food and fiber grown in safe and favorable environmental conditions Setting the stage with a consideration of the larger society's interests in agricultural issues and of social and agricultural interdependence the contributors cover a range of topics and issues affecting agriculture at the end of the 20th century Chapters examine public perceptions of government's role in farming support for an environmentally friendly agricultural system views on pesticides and chemicals in foods consumer attitudes on food safety threats to clean drinking water concerns over farm animal welfare and the basic agrarian ethic of American society The book concludes with a look to the future of the social risks of agriculture in the 21st century Priorities in Agricultural Research of the U.S. Department of Agriculture United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Administrative Practice and Procedure, 1978 **Water Management and Inclusive Growth of Agriculture** Prof. Bharat Daga Patil, 2021-02-02 INTRODUCTION Employing nearly on half of the world's workforce agriculture is clearly of great economic and social importance An incredible variety of methods is used globally the Western world has the latest scientific and industrial advancements at its disposal yet in some parts of the Third World a living is made using tools that have hardly changed in two thousand years Thus the study of agriculture geography is clearly important The subject may be simply defined Agricultural geography seeks to describe and explain spatial variations in agricultural activity over the earth's surface The heart of this task is to explain the great diversity of agriculture It has been estimated that there are over 250 million farmers in the world Between them they grow many different crops at least 1000 species are in use and they raise these crops in a variety of ways Thus on some British farms aircraft spray the land with pesticides and computers control the day to day running of the farm yet in parts of the Middle East fellahin still raise wheat with implements little changed since biblical times Equally great are the differences in organization and social conditions Many farmers in Britain or the USA are rich and successful owning their land in parts of Latin America peons toil

on land they do not own under conditions not far removed from slavery Even more striking are the differences in productivity One American farm worker can produce enough food to feed nearly fifty other people yet throughout Africa and Asia many farmers are hard pressed to feed themselves and their families David Grigg 1995 Civic Agriculture Thomas A. Lyson,2012-05-22 A engaging analysis of food production in the United States emphasizing that sustainable agricultural development is important to community health Troubled Harvest Joseph Cotter,2003-09-30 During the 20th century two revolutions swept rural Mexico the Mexican Revolution and the Green Revolution In both revolutionaries promised to address the problems of rural poverty and underdevelopment The Mexican Revolution led to a significant agrarian reform and created the State and elite that governed Mexico since the 1920s The Green Revolution helped increase Mexican agricultural production substantially and in 1970 it won a Nobel Peace Prize for Norman Borlaug who bred dwarf hybrid wheat Mexican agronomists played significant roles in both revolutions but neither revolution brought prosperity to peasant farmers This book examines the history of Mexican agronomy and agronomists to shed new light on the role of science in the Mexican Revolution the origins of the worldwide Green Revolution and general issues about the nature of the professions the impact of professionals ties to politics and the state and discourses between members of Mexico s urban middle class and peasantry Cotter also analyzes the impact of foreign models of science in Mexico the history of U S Mexican cooperation in the agricultural sciences and the factors that led Mexico to seek scientific assistance from the United States In a broad way he reveals new aspects of the ongoing struggle for the right to define modernity and progress in rural Mexico and offers new explanations for the failure of many of the State s efforts to assist peasant farmers The Changing Politics of Organic Food in North America Lisa F. Clark,2015-08-28 The Changing Politics of Organic Food in North America explores the political dynamics of the remarkable transition of organic food from a fringe fad in the 1960s to a multi billion dollar industry in the 2000s Taking a multidisciplinary institutio Hearings, Reports and Prints of the Senate Committee on Agriculture, Nutrition, and Forestry United States.
