Radical Environmentalism J. Cianchi, 2015-03-24 Radical Environmentalism Nature Identity and More than human Agency provides a unique account of environmentalism one that highlights the voices of activists and the nature they defend It will be of interest to both students and academics in green criminology environmental sociology and nature human studies more broadly

Radical Environmentalism Peter C. List, 1993 Is ecological sabotage a prank or terrorism Do women hold the key to rethinking environmentalism Are ecoactivists Goliaths of Doom Can radical and mainstream ecologists find common ground The readings in this book explore these and many other questions challenging conventional thinking about our relationship to the environment Unique among books on environmental ethics this anthology deals with themes of deep ecology ecofeminism and environmental activism considered radical stands by most environmental moderates On a philosophical level the selections present thought provoking responses to issues such as our ethical obligations to each other and nonhuman parts of nature the personal and social responsibilities of men and women to each other and proper personal and social reactions to the degradation of nature As concrete calls to action especially in the case of ecotage exponents of radical environmentalism often advocate measures more moderate environmentalists find ethically unacceptable both points of view are presented in this collection However as the editor of this provocative anthology states understanding this movement can help moderates sharpen their resolve to do more about environmental problems and find solutions which will check the relentless consumption of wild nature

Radical Ecology in the Face of the Anthropocene Extinction John A. Smith, Anna Wilson, 2024-06-14 This book has two interlocking ambitions The first is to steer what we purposefully call the idioms of critical philosophy towards a more ecologically informed paradigm The second is to recognise that what has rightly come to be called The Anthropocene extinction is not and cannot be treated as simply a scientific fact but rather a socio political and ecological dispute of immense complexity We start with an exploration of the consequences of a critical tradition which under the name Enlightenment has placed humanity at its centre and chance as its most general and problematic characteristic We argue that this leads to a schizophrenic relationship between radical critique and science which can be avoided if we take the implications of biosemiotics seriously and develop a new ecologically informed social science We argue that in practice this means that for science to be practical in addressing the Anthropocene extinction we have to recognise that it operates in a historically emergent highly differentiated technopolitical ecology Science as it is currently commonly understood and used is not ecological enough This book will interest social scientists interested in not only describing and critiquing but also understanding and responding to the complex problems facing humanity scientists wanting to make sense of social phenomena those educating the next generation of social scientists and climate activists and policy makers

Old World and New World Perspectives in Environmental Philosophy Martin Drenthen, Jozef Keulartz, 2014-07-28 This is the first collection of essays in which European and American philosophers explicitly think out their respective contributions and

identities as environmental thinkers in the analytic and continental traditions The American European as well as Analytic Continental collaboration here bears fruit helpful for further theorizing and research The essays group around three well defined areas of questioning all focusing on the amelioration management of environmentally historically and traditionally diminished landscapes The first part deals with differences between New World and the Old World perspectives on nature and landscape restoration in general the second focuses on the meaning of ecological restoration of cultural landscapes and the third on the meaning of the wolf and of wildness It does so in a way that the strengths of each philosophical school continental and analytic comes to the fore in order to supplement the other s approach This text is open to educated readers across all disciplines particularly those interested in restoration adaptation ecology the cultural construction of place and landscape the ongoing conversation about wilderness the challenges posed to global environmental change The text may also be a gold mine for doctoral students looking for dissertation projects in environmental philosophy that are inclusive of continental and analytic traditions This text is rich in innovative approaches to the questions they raise that are reasonably well thought out The fact that the essays in each section really do resonate with one another directly is also intellectually exciting and very helpful in working out the full dimensions of each question raised in the volume *Veganarchism -*

Philosophy, Praxis, Self-criticism Joseph Parampathu,2020-10-10 *Innovation and the Arts* Piero Formica,John Edmondson,2020-02-19 By dwelling on the need for the convergence of business innovation and the arts this book highlights the value of lowering the psychological organizational and institutional barriers that keep them apart For educators and practitioners this is an in depth discussion designed to stimulate awareness of the issues facing business education The Concept of Milieu in Environmental Ethics Lařna Droz,2021-08-24 The Concept of Milieu in Environmental Ethics discusses how we can come together to address current environmental problems at the planetary level such as climate change biodiversity loss transborder pollution and desertification The book recognises the embedded individual sociocultural and environmental contexts that impact our everyday choices It asks in this pluralism of worldviews how can we build common ground to tackle environmental issues What is our individual moral responsibility within the larger collaborative challenge Through philosophical reasoning this book pragmatically addresses these questions and builds a framework to support sustainable ways of living At the core of the book it draws on the concept of milieu f do inspired by the Japanese philosopher Watsuji Tetsur which captures how we act within and perceive our surroundings as a web of culturally historically and geographically situated meanings and values It argues that the milieu connects us as individuals with community past and future history and the natural world providing us with common ground for global environmental ethics This book will be an engaging and interesting read for scholars researchers and students in environmental ethics philosophy and sustainability

Fostering an Ecological Shift Through Effective Environmental Education Kochetkova, Tatjana,2024-06-05 In the face of our planet s escalating environmental crisis and climate change humanity stands at a crossroads urgently requiring a

transformative response The task of averting environmental destruction necessitates not only a shift in our economy and technology but more fundamentally a profound cultural transformation This imperative transformation involves a collective move from the self centered Ego to an ecologically conscious Eco To unravel the complexities of this metamorphosis scholars are turning to the potent tool of environmental education recognized for its capacity to foster personal and social growth while promoting environmental conservation Enter *Fostering an Ecological Shift Through Effective Environmental Education* a groundbreaking exploration into the transformative power of education in the pursuit of sustainable change As readers embark on this scholarly journey the book reveals the profound psychological connection to nature achievable through environmental education It scrutinizes the connection between heightened nature awareness and the adoption of sustainable practices providing valuable insights for educators at various levels The chapters traverse diverse topics from the historical roots of environmental education to the role of indigenous knowledge yoga and eco spirituality within nature education The book s comprehensive approach extends to eco therapy forest school programs and the influence of parents in environmental education By scrutinizing case studies and global movements this work illuminates the achievements and challenges of environmental education on both national and global scales *Environmental Philosophy* Christopher Belshaw,2014-12-18 This introduction to the philosophy of the environment examines current debates on how we should think about the natural world and our place within it The subject is examined from a determinedly analytic philosophical perspective focusing on questions of value but taking in attendant issues in epistemology and metaphysics as well The book begins by considering the nature extent and origin of the environmental problems with which we need to be concerned Chapters go on to consider familiar strategies for dealing with environmental problems and then consider what sort of things are of direct moral concern examining in turn at animals non sentient life forms natural but non living things and deep ecology The final part of the book investigates notions of value natural beauty and the place of human beings in the scheme of things **Climate Crisis, Psychoanalysis, and Radical Ethics** Donna M. Orange,2016-09-13 Psychoanalysis engages with the difficult subjects in life but it has been slow to address climate change *Climate Crisis Psychoanalysis and Radical Ethics* draws on the latest scientific evidence to set out the likely effects of climate change on politics economics and society more generally including impacts on psychoanalysts Despite a tendency to avoid the warnings times of crisis summon clinicians to emerge from comfortable consulting rooms Daily engaged with human suffering they now face the inextricably bound together crises of global warming and massive social injustices After considering historical and emotional causes of climate unconsciousness and of compulsive consumerism this book argues that only a radical ethics of responsibility to be my other s keeper will truly wake us up to climate change and bring psychoanalysts to actively take on responsibilities such as demanding change from governments living more simply flying less and caring for the earth and its inhabitants everywhere Linking climate justice to radical ethics by way of psychoanalysis Donna Orange explores many relevant aspects of psychoanalytic expertise referring

to work on trauma mourning and the transformation of trouble into purpose Orange makes practical suggestions for action in the psychoanalytic and psychotherapeutic communities reducing air travel consolidating organizations and conferences better use of internet communication and education This book includes both philosophical considerations of egoism close to psychoanalytic narcissism as problematic together with work on shame and envy as motivating compulsive and conspicuous consumption The interweaving of climate emergency and massive social injustice presents psychoanalysts and organized psychoanalysis with a radical ethical demand and an extraordinary opportunity for leadership Climate Crisis Psychoanalysis and Radical Ethics will provide accessible and thought provoking reading for psychoanalysts and psychotherapists as well as philosophers environmental studies scholars and students studying across these fields
