## **Radical Ecology The Search For A Livable World:**

Radical Ecology Carolyn Merchant, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informal company Radical Ecology Carolyn Merchant, 1992 Examines the major philosophical ethical scientific and economic roots of environmental problems and identifies ways in which radical ecologists can transform science and society in order to sustain life Gary Bryner, *The Historical Dictionary of Environmentalism* strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries Performing Marx Bradley J. Macdonald, 2012-02-01 *Performing Marx* looks at what it means to be a Marxist dealing with contemporary political and theoretical developments in the twenty first century Drawing upon Marx's work Western Marxism and poststructuralist theory Bradley J Macdonald explores how a living tradition of Marx's ideas can constructively engage a politics of desire and pleasure ecological sustainability a politics of everyday life that takes seriously popular culture and the nature of globalization and of the radical forces being arrayed against the logics of global capitalism By engaging such crucial issues Macdonald also provides important clarifications of the work of William Morris Guy Debord and the situationists Michel Foucault Antonio Negri Ernesto Laclau and Chantal Mouffe as they relate to Marx *Feminist Thought, Student Economy Edition* Rosemarie Tong, 2018-10-03 This book provides a clear comprehensive and incisive introduction to the major traditions of feminist theory from liberal feminism radical feminism and Marxist and socialist feminism to care focused feminism psychoanalytic feminism women of color feminisms and ecofeminism **Feminist Thought** Rosemarie Putnam Tong, 2013-07-09 A classic resource on feminist theory *Feminist Thought* offers a clear comprehensive and incisive introduction to the major traditions of feminist theory from liberal feminism radical feminism and Marxist and socialist feminism to care focused feminism psychoanalytic feminism and ecofeminism The fifth edition has been thoroughly revised and now includes a new chapter on Third Wave and Third Space Feminism Also added to this edition are significantly expanded discussions on women of color feminisms psychoanalytic and care feminisms as well as new examinations of queer theory LGBTQ and trans feminism Learning tools like end of chapter discussion questions and the bibliography make *Feminist Thought* an essential resource for students and thinkers who want to understand the theoretical origins and complexities of contemporary feminist debates *Environment and Society* Erika Cudworth, 2005-08-04 At the start of the twenty first century it can be argued that human societies have a greater impact on the environment than ever before We have always been dependent upon and interacted with the natural environment However the dramatic social changes of the past three centuries have altered the form of our relationship with non human nature to the extent that some would see people planet relations as in a situation of crisis *Environment and Society* provides a comprehensive and critical account of

the ways in which we can think about the relationship between human societies and the environments with which they interact. It argues that human societies are ecologically embedded and that environments are often socially embedded and constituted. It makes the different theoretical positions and empirical studies accessible to students and includes chapter outlines and summaries annotated further reading, boxed case studies and discussion points. **Global Environmental**

**Politics** Jean-Frédéric Morin, Amandine Orsini, Sikina Jinnah, 2020. *Global Environmental Politics* provides a fully up to date and comprehensive introduction to the most important issues dominating this fast moving field. Going beyond the issue of climate change, the textbook also introduces students to the pressing issues of desertification, trade in hazardous waste, biodiversity protection, whaling, acid rain, ozone depletion, water consumption and over fishing. Importantly, the authors pay particular attention to the interactions between environmental politics and other governance issues such as gender, trade, development, health, agriculture and security. Gender and Environment in Science Fiction Bridgitte Barclay, Christy Tidwell, 2020-07-07. *Gender and Environment in Science Fiction* focuses on the variety of ways that gender and nature interact in science fiction films and fictions, exploring questions of different realities and posing new ones. Science fiction asks questions to propose other ways of living; it asks what if, and that question is the basis for alternative narratives of ourselves and the world we are a part of. What if humans could terraform planets? What if we could create human/nonhuman hybrids? What if artificial intelligence gains consciousness? What if we could realize kinship with other species through heightened empathy or traumatic experiences? What if we imagine a world without oil? The texts analyzed in this book ask these questions and others, exploring how humans and nonhumans are connected, how nonhuman biologies can offer diverse ways to think about human sex, gender and sexual orientation, and how interpretive strategies can subvert the messages of older films and written texts. Muslim Environmentalisms Anna M. Gade, 2019-08-20. How might understandings of environmentalism and the environmental humanities shift by incorporating Islamic perspectives? In this book, Anna M. Gade explores the religious and cultural foundations of Islamic environmentalisms. She blends textual and ethnographic study to offer a comprehensive and interdisciplinary account of the legal, ethical, social and empirical principles underlying Muslim commitments to the earth. *Muslim Environmentalisms* shows how diverse Muslim communities and schools of thought have addressed ecological questions for the sake of this world and the world to come. Gade draws on a rich spectrum of materials: scripture, jurisprudence, science, art and social and political engagement, as well as fieldwork in Indonesia and Southeast Asia. The book brings together case studies in disaster management, educational programs, international development, conservation projects, religious ritual and performance, and Islamic law to rethink key theories. Gade shows that the Islamic tradition leads us to see the environment as an ethical idea moving beyond the established frameworks of both nature and crisis. *Muslim Environmentalisms* models novel approaches to the study of religion and environment from a humanistic perspective, reinterpreting issues at the intersection of numerous academic disciplines to propose a postcolonial and global

understanding of environment in terms of consequential relations
