Radio In The Television Age:

Radio in the Television Age Pete Fornatale, 1983-05-02 A history of modern radio shows why radio survived the advent of television covers radio advertising programming technology and news and discusses radio pioneers noncommercial radio and government deregulation Google Books

Talking Radio: An Oral History of American Radio in the Television Age Michael C. Keith, 2020-07-24 Includes interviews with such well known personalities as Walter Cronkite Dick Clark Steve Allen Art Linkletter Paul Harvey Howard K Smith Ed McMahon Bruce Morrow as well as more than fifty other individuals who were or continue to be actively involved in radio

Australian Newspapers in the Television Age, 1956-2006 Rodney Tiffen, 2025-04-15 This book looks at Australian newspapers over the half century following the introduction of television in 1956 Through a quantitative study it illuminates how the nature of news has changed and how central journalistic practices have developed It examines newspapers changing size and structure their story priorities their use of visual aids and interpretive frames their changing range and treatment of sources and how these changes affected their political and international coverage The content analysis shows a dominant theme of growth and improvement Newspapers offered their readers much more at the end of the half century than at the beginning The much larger volume of news was presented in more visually attractive and reader friendly ways than before News agendas expanded in response both to changing reader interests and a changing political environment Newspapers had a more active orientation towards using a wider range of sources All papers shared in the major trends but to varying degrees so that by the end of the period there were sharper differences between the papers than at the beginning Mapping the multi dimensional nature of change in this pivotal period lays a groundwork for analysing the changing nature of journalism during the existential crisis that news organisations are now facing during the digital age

European Cinemas in the Television Age Dorota Ostrowska, 2007-02-01 European Cinemas in the Television Age is a radical attempt to rethink the post war history of European cinemas The authors approach the subject from the perspective of television s impact on the culture of cinema s production distribution consumption and reception Thus they indicate a new direction for the debate about the future of cinema in Europe In every European country television has transformed economic technological and aesthetic terms in which the process of cinema production had been conducted Television s growing popularity has drastically reshaped cinema s audiences and forced governments to introduce policies to regulate the interaction between cinema and television in the changing and dynamic audio visual environment It is cinematic criticism which was slowest in coming to terms with the presence of television and therefore most instrumental in perpetuating the view of cinema as an isolated object of aesthetic critical and academic inquiry The recognition of the impact of television upon European cinemas offers a more authentic and richer picture of cinemas in Europe which are part of the complex audiovisual matrix including television and new media

Television Age ,1962

Television in the Antenna Age David Marc, Robert Thompson, 2008-04-15 Television in the Antenna Age is a brief accessible and engaging overview of the

medium's history and development in the US Integrating three major concerns television as an industry a technology and an art the book is a basic primer on the complex fascinating and often overlooked story of television and its impact on American life Covers the entire history of American television from its urban middle class beginnings in the late 40s to the contemporary impact of new technologies and consolidated corporate Includes interview segments with industry insiders pictures and sidebars to illustrate important figures trends and events

The Age of Television Martin Esslin, 2017-07-05 Having spent most of his career working with the British Broadcasting Corporation BBC Martin Esslin appraises American TV with the eyes of both a detached outsider and a concerned insider American popular culture writes Esslin has become the popular culture of the world at large American television is thus more than a purely social phenomenon It fascinates and in some instances frightens the whole world The Age of Television discusses television as an essentially dramatic form of communication pointing to the strengths and weaknesses that spring from its character It explores its impact on generations destined to grow up under its influence with such questions as how TV turns reality into fiction and fiction into reality Esslin considers the long term effects of television on our abilities to reason to read to create He asks if current programming on American television constitutes what we want and deserve and asks what we would change if we could These are but a handful of the questions Esslin probes in this penetrating analysis of contemporary television and its impact on our lives In his new introduction Esslin discusses changes in the media over the last two decades He explores the increasing number of television stations available the rise of boutique channels concentrating on news sports or film and the relationship between television and other forms of electronic media such as video games and the Internet Finally he considers the effect of these developments on our ability to concentrate our sensitivity to violence and even our artistic taste Most compelling of all is his final question Can the Age of Television with all its dangers yet become a golden age of cultural growth Martin Esslin is professor emeritus of drama at Stanford University His numerous critical works include Brecht The Man and his Work The Theatre of the Absurd An Anatomy of Drama and Artaud He cur

Television/radio Age ,1987 Hollywood in the Age of Television Tino Balio, 2013-12-17 This collection of papers examines the evolving relationship between the motion picture industry and television from the 1940s onwards The institutional and technological histories of the film and TV industries are looked at concluding that Hollywood and television had a symbiotic relationship from the start Aspects covered include the movement of audiences the rise of the independent producer the introduction of colour and the emergence of network structure cable TV and video recorders Originally published in 1990

The Presidency in the Era of 24-Hour News Jeffrey E. Cohen, 2010-11-16 The Presidency in the Era of 24 Hour News examines how changes in the news media since the golden age of television when three major networks held a near monopoly on the news people saw in the United States have altered the way presidents communicate with the public and garner popular support How did Bill Clinton manage to maintain high approval ratings during the Monica Lewinsky scandal Why has the Iraq war mired George Bush in the lowest approval

ratings of his presidency Jeffrey Cohen reveals how the decline of government regulation and the growth of Internet and cable news outlets have made news organizations more competitive resulting in decreased coverage of the president in the traditional news media and an increasingly negative tone in the coverage that does occur He traces the dwindling of public trust in the news and shows how people pay less attention to it than they once did Cohen argues that the news media's influence over public opinion has decreased considerably as a result and so has the president's ability to influence the public through the news media This has prompted a sea change in presidential leadership style Engaging the public less to mobilize broad support presidents increasingly cultivate special interest groups that often already back the White House's agenda This book carries far reaching implications for the future of presidential governance and American democracy in the era of new media
