Radio Techniques for Probing the Terrestrial Ionosphere Robert D. Hunsucker, 2013-03-07 In the years since the pioneering efforts of Sir Edward Appleton M A F Barnett G Breit and M A Thve many radio techniques have been employed to investigate the terrestrial ionosphere The purposes of this book are to exam ine the basic physical interaction process of radio waves with the ionosphere scrutinize each of the radio techniques currently in use and describe the elements of each technique as well as assess their capabilities and limitations I have included some of the history of each technique since we often tend to forget the efforts of the pioneers The interaction of radio waves with the terrestrial ionosphere has been described in considerable detail in several classic treatments e g Ratcliffe 1959 Al pert 1963 Budden 1961 and Davies 1965 Rishbeth and e g Flock 1979 Davies Garriott 1969 and in other more recent books 1990 Hargreaves 1979 and Budden 1985 A few of the radio techniques have been described by Hargreaves 1979 and a book by Giraud and Petit 1978 has also included discussion of several of the techniques The WITS handbook No 2 1989 also contains description of several radio techniques
