Advisory Committee on Human Radiation Experiments, 1995 **Final Report: Sources and documentation** United States. Advisory Committee on Human Radiation Experiments, 1995 **The Chemistry of the Actinide and Transactinide Elements (3rd ed., Volumes 1-5)** L.R. Morss, Norman M. Edelstein, Jean Fuger, 2007-12-31 The Chemistry of the Actinide and Transactinide Elements is a contemporary and definitive compilation of chemical properties of all of the actinide elements especially of the technologically important elements uranium and plutonium as well as the transactinide elements In addition to the comprehensive treatment of the chemical properties of each element ion and compound from atomic number 89 actinium through to 109 meitnerium this multi volume work has specialized and definitive chapters on electronic theory optical and laser fluorescence spectroscopy X ray absorption spectroscopy organoactinide chemistry thermodynamics magnetic properties the metals coordination chemistry separations and trace analysis Several chapters deal with environmental science safe handling and biological interactions of the actinide elements The Editors invited teams of authors who are active practitioners and recognized experts in their specialty to write each chapter and have endeavoured to provide a balanced and insightful treatment of these fascinating elements at the frontier of the periodic table Because the field has expanded with new spectroscopic techniques and environmental focus the work encompasses five volumes each of which groups chapters on related topics All chapters represent the current state of research in the chemistry of these elements and related fields **The Chemistry of the Actinide and Transactinide Elements (Set Vol.1-6)** L.R. Morss, Norman M. Edelstein, Jean Fuger, 2010-10-21 The fourth edition of The Chemistry of the Actinide and Transactinide Elements comprises all chapters in volumes 1 through 5 of the third edition published in 2006 plus a new volume 6 To remain consistent with the

plan of the first edition to provide a comprehensive and uniform treatment of the chemistry of the actinide and transactinide elements for both the nuclear technologist and the inorganic and physical chemist and to be consistent with the maturity of the field the fourth edition is organized in three parts The first group of chapters follows the format of the first and second editions with chapters on individual elements or groups of elements that describe and interpret their chemical properties A chapter on the chemical properties of the transactinide elements follows The second group chapters 15-26 summarizes and correlates physical and chemical properties that are in general unique to the actinide elements because most of these elements contain partially filled shells of 5f electrons whether present as isolated atoms or ions as metals as compounds or as ions in solution The third group chapters 27-39 focuses on specialized topics that encompass contemporary fields related to actinides in the environment in the human body and in storage or wastes Two appendices at the end of volume 5 tabulate important nuclear properties of all actinide and transactinide isotopes Volume 6 Chapters 32 through 39 consists of new chapters that focus on actinide species in the environment actinide waste forms nuclear fuels analytical chemistry of plutonium actinide chalcogenide and hydrothermal synthesis of actinide compounds The subject and author indices and list of contributors encompass all six volumes

Trace Metals and Fluoride in Bones and Teeth Nicholas D. Priest, Frank Van de Vyver, 2024-12-20 This volume is a comprehensive introduction to the analysis binding uptake metabolism kinetics modeling distribution occurrence toxicity and chelation of metals and fluoride in the body with special reference to mineralized tissues Both toxic and relatively harmless polyvalent cations and anions are considered Included are some which are stable and others which are radioactive While a number are essential trace elements others have no known metabolic role Most chapters are concerned with the uptake of bone seeking ions by the living skeleton but aspects of the post mortem uptake of metals and the process of fossilization are also considered Highlighted are the utility of modern analytical techniques and the more important bone seeking elements including aluminum lead cadmium fluorine and the radioactive heavy metals including uranium and plutonium This important publication is of particular value to those in the fields of biochemistry radioactive waste geology physiology dentistry orthopedics radiology and nuclear medicine urology industrial hygiene pharmacology anthropology paleontology and archeology

Metal Ions in Biological Systems Sanat Dhar, 2013-03-09 The articles published in this volume are based on the papers delivered at a conference on the Role of Metal Ions in Biological Systems held November 20 and 21 1972 at Argonne National Laboratory The purpose of the conference was to present to an interdisciplinary audience of physical scientists some recent developments illustrating the chemical and environmental participation of the heavy metal ions in the biological system The invited speakers at the conference are specialists in the fields they describe and the articles presented here are at a level of interest to readers with backgrounds in physical sciences who are not necessarily doing research in the areas described The articles are referenced through 1972 and in some cases early 1973 and thus should also be of value to research workers It is hoped that the book will be of particular interest to

chemists biologists workers in the fields of environmental science and public health as well as graduate and senior undergraduate students in these disciplines The conference was sponsored by the Central States Universities Inc a consortium of sixteen midwestern universities the Center for Educational Affairs Argonne National Laboratory and the United States Atomic Energy Commission It is my pleasure to thank the members of the conference committee for their ideas and active help in organizing the conference Nuclear Science Abstracts ,1965 **NIH Library Booklist** ,1963
