The RAF and Aircraft Design, 1923-1939 Colin Sinnott, 2001 This work describes the vital role of the Air Ministry in the development of the RAF's fighters and bombers before WWII

The RAF and Aircraft Design Colin S Sinnott, 2014-05-22 This work examines the evolution of the RAF's operational requirements for its home defence air force for bombers to mount a deterrent counter offensive and for fighters to provide direct defence of Britain It discusses the management processes policies and decisions relevant to operational requirements on the basis of a detailed study of Air Ministry papers of the time By tracing the development of operational requirements the author exposes the thinking behind the RAF's quest for effective fighter and bomber aircraft He describes the ideas and concepts of air warfare that were adopted in the 1920s and shows how these evolved into the Air Staff's requirements for the aircraft which the RAF entered and fought in World War II

Warfare in Europe 1919-1938 Geoffrey Jensen, 2017-05-15 Although ostensibly a time of peace one of the richest and most fascinating periods in military history falls between the two world wars With good reason even today military theorists look to these years for relevant lessons The articles and papers collected together in this volume highlight the major themes and developments of interwar military affairs in Europe including the new doctrines of tank warfare air power German Blitzkrieg and Soviet operational art They also demonstrate the important place of the major armed conflicts of the period such as the Russian and Spanish Civil Wars in European history

Harris, 2006-02-17 Includes two new chapters One of the more interesting and better books on military aviation to appear in the last few years *Journal of Military History* Since the publication of the first edition of *Why Air Forces Fail* the debate over airpower's role in military operations has only intensified Here eminent historians Robin Higham and Stephen J Harris assemble a team of experts to add essential new details to their cautionary tale for current practitioners of aerial warfare Together the contributors examine the complex often deep seated reasons for the catastrophic failures of the Russian Polish French British Italian German Argentine and American air services Complemented
