very materials composing the land itself In Part I Marc Treib addresses the geographical anthropological and architectural aspects of church building in New Mexico and provides background on the church as both an institution and a building type Part II presents thirty churches in depth and discusses such topics as sitting construction in adobe and stone the use of light ornamentation and the issues surrounding restoration Sanctuaries of Spanish New Mexico is the only book in print to include all the major church sites still extant Richly illustrated with specially prepared plans of the churches it will be welcomed by architectural historians and anyone with an interest in the American Southwest Among the oldest buildings in the United States the churches of Spanish New Mexico made of earth of stone of wood are the surprisingly fragile reminders of a unique amalgam of Spanish architectural ideas and native American Pueblo culture This book **Spanish Acres** Hal George Evarts, 1925
