Railways In The Cinema:

Railways in the Cinema John Huntley, 1969 **The Railway and Modernity** Matthew Beaumont, Michael J.

Freeman, 2007 Most research and writing on railway history has been undertaken in a way that disconnects it from the wider cultural milieu. Authors have been very effective at constructing specialist histories of transport but have failed to register the railway's central importance in the representation and understanding of modernity. This book brings together contributions from a range of established scholars in a variety of disciplines with the central purpose of exploring the railway less as a transport technology than as a key signifier of capitalist modernity. It examines the complex social relations in which the railway became historically embedded, identifying it as a central problematic in the cultural experience of modernity. It avoids the limitations of both the close-sighted empiricism typical of many transport historians and the long-sighted generalizations of cultural commentators who view the railway merely as a shorthand for the concept of progress over the nineteenth and twentieth centuries. The book draws on a diverse range of materials including literary and historical forms of representation. It is also informed by a creative application of various critical theories. From Steam to Screen Rebecca

Harrison, 2018-03-22 In late nineteenth and early twentieth century Britain there was widespread fascination with the technological transformations wrought by modernity. Films, newspapers and literature told astonishing stories about technology such as locomotives breaking speed records and moving images seemingly springing into life onscreen. And whether in films about train travel or in newspaper articles about movie theatres on trains, stories about the convergence of the railway and cinema were especially prominent. Together the two technologies radically transformed how people interacted with the world around them and became crucial to how British media reflected the nation's modernity and changing role within the empire. Rebecca Harrison draws on archival sources and an extensive corpus of films to trace the intertwined histories of the train and the screen for the first time. In doing so she presents a new and illuminating material and cultural history of the period and demonstrates the myriad ways railways and cinema coalesced to transform the population's everyday life. With examples taken from more than 240 newsreels and 40 feature length films, From Steam to Screen is essential reading for students and researchers working on film studies and British history at the turn of the century and beyond. Railways and Culture in Britain Ian Carter, 2001

The 19th century steam railway epitomized modernity's relentlessly onrushing advance. Ian Carter delves into the cultural impact of the train. Why, for example, did Britain possess no great railway novel? He compares fiction and images by canonical British figures, Turner, Dickens, Arnold Bennett, with selected French and Russian competitors, Tolstoy, Zola, Monet, Manet. He argues that while high cultural work on the British steam railway is thin, British popular culture did not ignore it. Detailed discussions of comic fiction, crime fiction and cartoons reveal a popular fascination with railways tumbling from vast and hitherto unexplored stores of critically overlooked genres. The Locomotive News and Railway Contractor, 1922 The Cinema of Attractions Reloaded Wanda Strauven, 2025-10-01 What

have Lumi re in common with Wachowski More than one hundred years separate these two pairs of brothers who astonished quite similarly the film spectator of their respective time with special effects of movement a train rushing into the audience and a bullet flying in slow motion Do they belong to the same family of cinema of attractions Twenty years ago Tom Gunning introduced the phrase cinema of attractions to define the essence of the earliest films made between 1895 and 1906 His term scored an immediate success even outside the field of early cinema The present anthology questions the attractiveness and usefulness of the term for both pre classical and post classical cinema With contributions by the most prominent scholars of this discipline such as Tom Gunning Andr Gaudreault Thomas Elsaesser Charles Musser Scott Bukatman and Vivian

Are We There Yet? Alison Byerly, 2012-12-26 Are We There Yet Virtual Travel and Victorian Realism connects the Victorian fascination with virtual travel with the rise of realism in nineteenth century fiction and twenty first century experiments in virtual reality Even as the expansion of river and railway networks in the nineteenth century made travel easier than ever before staying at home and fantasizing about travel turned into a favorite pastime New ways of representing place 360 degree panoramas foldout river maps exhaustive railway guides offered themselves as substitutes for actual travel Thinking of these representations as a form of virtual travel reveals a surprising continuity between the Victorian fascination with imaginative dislocation and twenty first century efforts to use digital technology to expand the physical boundaries of the self French-language Road Cinema Gott Michael Gott, 2016-05-31 Over the past two decades road cinema has become an increasingly popular form of expression for European directors Focusing on a corpus of films from France Belgium and Switzerland including works by Ismael Ferroukhi Bouli Lanners Aki Kaurismäki and Jacqueline Audry amongst many others French language Road Cinema contends that nowhere is the impulse to remap the spaces and identities of New Europe more evident than in French language cinema Drawing on mobility studies cultural geography and film theory this innovative work sketches out the flexible yet distinctive parameters of contemporary French language road cinema and argues for an understanding of the road movie not as a genre but as a thematic and formal template that crosses cinematic categories to bring together a wide array of films that narrate the movements of migrants tourists and business executives

Gayle Letherby, Gillian Reynolds, 2020-08-25 This book provides an in depth exploration of trains and train travel Letherby and Reynolds have conducted extensive research with all those concerned with trains from leisure travelers and enthusiasts to railway workers and commuters Overturning conventional wisdom they show that the train has a social life in and of itself and is not simply a way to get from A to B The book also looks at the depiction of train travel through cultural media such as music films books and art The authors consider the personal politics of train travel and political discussion surrounding the railways as well as the relationship trains have to leisure and work The media often paints a gloomy picture of the railways and there is a general view that the romance of train travel ended with the steam locomotive Letherby and Reynolds show that this is far from the case The Victorian Railways Magazine ,1924 **Indian State Railways Magazine** ,1929
