Borrelli, 2016-07-29 This book will discuss how glass and glass ceramic interact with light both transiently and permanently Ways that light permanently alter the properties of glass and glass ceramic like the color refractive index and mechanical and chemical behaviors will be included Each photochromatic phenomenon will be discussed in detail from the physical and chemical origin to the method fabrication and ultimately to their utilization

The Glass Ocean Lori Baker, 2014-07-29 I write in retrospect from the vantage of a distant shore Flame haired six foot two in stocking feet eighteen year old Carlotta Dell oro recounts the lives of her parents solitary glassmaker Leopoldo Dell oro and beautiful unreachable Clotilde Girard and discovers in their loves and losses their omissions and obsessions the circumstances of her abandonment and the weight of her inheritance Thomas Pynchon calls debut novelist Lori Baker a storyteller with uncanny access to the Victorians not only to the closely woven texture of their days but also to the dangerous nocturnal fires being attended to in their hearts Carlotta s story begins in 1841 when Leo and Clotilde meet aboard the Narcissus on an expedition led by Clotilde s magnanimous adventuring father Leo is commissioned to draw the creatures of the deep sea but is bewitched instead by golden Clotilde beginning a devotion that will prove inescapable Clotilde meanwhile sees only her dear papa but when he goes missing she is pushed to Leo returning with him to the craggy English shores of Whitby the place to which Leo vowed he would never return There they form an uneasy coexistence lost to one another The events of the Narcissus haunt them leaving Clotilde grieving for her father while Leo becomes possessed by the work of transforming his sea sketches into glass But in finding his art he surrenders Clotilde and the distance between the two is only magnified by the birth of baby Carlotta Years have passed and Carlotta is now grown A friend from the past comes to Whitby and with his arrival sets into motion the Dell oros inevitable disintegration In hypnotic inimitable prose Lori Baker s *The Glass Ocean* transforms a story of family into something as otherworldly and mesmerizing as life beneath the sea itself

Light Jennifer Lawson, 2001 The eight lessons in this module introduce students to light sources and the characteristics of light such as its ability to travel and reflect Students investigate translucent transparent and opaque materials and explore the science of shadows They also examine the evolution of light technology and the design and construction of optical devices Also included materials lists activity descriptions questioning techniques activity centre and extension ideas assessment suggestions activity sheets and visuals The module offers a detailed introduction to the Hands On Science program guiding principles implementation guidelines an overview of the skills that young students use and develop during scientific inquiry a list of children s books and websites related to the science topics introduced and a classroom assessment plan with record keeping templates
