Religion And Secularization:

The Future of Religion Rodney Stark, William Sims Bainbridge, 1985 Religion is alive and well in the modern world and the social scientific study of religion is undergoing a renaissance For much of this century respected social theorists predicted the death of religion as inevitable consequence of science education and modern economics But they were wrong Stark and Bainbridge set out to explain the survival of religion Using information derived from numerous surveys censuses historical case studies and ethnographic field expeditions they chart the full sweep of contemporary religion from the traditional denominations to the most fervent cults This wealth of information is located within a coherent theoretical framework that examines religion as a social response to human needs both the general needs shared by all and the desires specific to those who are denied the economic rewards or prestige enjoyed by the privileged By explaining the forms taken by religions today Stark and Bainbridge allow us to understand its persistence in a secular age and its prospects for the future

religion secularization theory the market model of religion and the individualization thesis are applicable to the data this book will be of interest to scholars of sociology politics and religion exploring religious trends and attitudes in contemporary Europe *Religion, Secularization and Political Thought* James E. Crimmins, 2013-05-02 The increasing secularization of political thought between the mid seventeenth and mid nineteenth centuries has often been noted but rarely described in detail The contributors to this volume consider the significance of the relationship between religious beliefs dogma and secular ideas in British political philosophy from Thomas Hobbes to J S Mill During this period Britain experienced the advance of natural science the spread of education and other social improvements and reforms in the political realm These changes forced religion to account for itself and to justify its existence both as a social institution and as a collection of fundamental articles of belief about the world and its operations This book originally published in 1990 conveys the crucial importance of the association between religion secularization and political thought *Secularization* Karel Dobbelaere, 2002 In an epoch in which religion has explicitly and sometimes violently returned to the forefront of the global public scene the process of secularization that has fundamentally marked Western and particularly European societies demands attention and analysis This book written from a sociological perspective takes up that challenge The author distinguishes three levels of secularization Societal secularization which is a typical consequence of the processes of modernity and of programmes of laicisation promoted by political parties Individual secularization that is manifested in the decline of church commitment occurring as individuals re compose their personal beliefs and practices in a religion a la carte and as the individual s meaning system becomes compartmentalized and religion is separated from other areas of life A third level organizational secularization covers the incidence of the adaptation of religious bodies to secularized society The entire work is marked by meticulous description and analysis of numerous theoretical and empirical studies and by due recognition of the intricate relationship between levels of secularization and the impact of various actors in the many conflicts over religion s roles

The Secularization of Early Modern England Charles John Sommerville, 1992 This study overcomes the ambiguity and daunting scale of the subject of secularization by using the insights of anthropology and sociology and by examining an earlier period than usually considered Concentrating not only on a decline of religious belief which is the last aspect of secularization this study shows that a transformation of England s cultural grammar had to precede that loosening of belief and that this was largely accomplished between 1500 and 1700 Only when definitions of space and time changed and language and technology were transformed as well as art and play could a secular world view be sustained As aspects of daily life became divorced from religious values and controls religious culture was supplanted by religious faith a reasoned rather than an unquestioned belief in the supernatural Sommerville shows that this process was more political and theological than economic or social *Sacred and Secular* Pippa Norris, Ronald Inglehart, 2004-09-20 Seminal thinkers of the nineteenth century Auguste Comte Herbert Spencer Emile Durkheim Max Weber Karl Marx and Sigmund Freud all

predicted that religion would gradually fade in importance and cease to be significant with the emergence of industrial society. The belief that religion was dying became the conventional wisdom in the social sciences during most of the twentieth century. During the last decade however the secularization thesis has experienced the most sustained challenge in its long history. The traditional secularization thesis needs updating. Religion has not disappeared and is unlikely to do so. Nevertheless the concept of secularization captures an important part of what is going on. This book develops a theory of secularization and existential security. *Sacred and Secular* is essential reading for anyone interested in comparative religion, sociology, public opinion, political behavior, political development, social psychology, international relations and cultural change.

Secularization Steve Bruce, 2011-01-27. Secularization remains one of the most hotly debated topics in the study of religion in modern societies. Steve Bruce elaborates the sociological secularization paradigm and defends it against a wide variety of recent attempts at rebuttal and refutation.

Secularization and Religious Innovation in the North Atlantic World David Hempton, Hugh McLeod, 2017. In the early twenty first century it had become a cliché that there was a God Gap between a more religious United States and a more secular Europe. The apparent religious differences between the United States and western Europe continue to be a focus of intense and sometimes bitter debate between three of the main schools in the sociology of religion. According to the influential Secularization Thesis secularization has been an integral part of the processes of modernization in the Western world since around 1800. For proponents of this thesis the United States appears as an anomaly and they accordingly give considerable attention to explaining why it is different. For other sociologists however the apparently high level of religiosity in the USA provides a major argument in their attempts to refute the Thesis.

Secularization and Religious Innovation in the North Atlantic World provides a systematic comparison between the religious histories of the United States and western European countries from the eighteenth to the late twentieth century, noting parallels as well as divergences, examining their causes and especially highlighting change over time. This is achieved by a series of themes which seem especially relevant to this agenda and in each case the theme is considered by two scholars. The volume examines whether American Christians have been more innovative and if so how far this explains the apparent God Gap. It goes beyond the simple American-European binary to ask what is American or European in the Christianity of the nineteenth and twentieth centuries and in what ways national or regional differences outweigh these commonalities.
