Believing that the intellectual enterprise called philosophy is essentially a part of the cultural as well as historical experience of a people that the concepts and problems that occupy the attention of philosophers placed in different cultural spaces or historical times generally derive directly from those spaces and times and that philosophy in turn has been most relevant to the development of human cultures the Ghanaian philosopher Kwame Gyekye gives reflective attention in this book to some of the concepts and problems that in his view feature most prominently in the contemporary African cultural social political and moral experience Such concepts and problems include the following political legitimacy development culture and the pursuit of science and technology political corruption democracy representation and the politics of inclusion the status of cultural values in national orientation understanding globalization and others It is these topics that are covered in the essays collected in this book The unrelenting pursuit of the speculative activity by the philosopher in most cases eventuates in normative proposals these normative proposals often embody a vision a vision of an ideal human society in terms of its values politics and culture Vision understood here has human not supernatural or divine origination and involvement and requires action by human beings in order for it to come into reality A vision may derive from sustained critical evaluation of a culture or some elements of it Gyekye attempts an articulation of the visions of the essays contained in the book Even though philosophical ideas and concerns are originally inspired by and worked out in a cultural milieu it does not necessarily follow Gyekye strongly believes that the relevance of those ideas and insights is to be tethered to the cultures that produced them For more often than not the relevance of those ideas or at least some of them transcends the confines of their own times and cultures and can be appreciated by other societies or cultures or generational epochs This trans cultural or trans epochal or meta contextual appeal or attraction of philosophical ideas and insights spawned by a particular culture or cluster of cultures or in specific historical times is to be put down to our common human nature including our basic human desires and aspirations Thus most of the essays published here should be of interest to the global community i e to cultures and societies beyond the African

Christology in Cultural Perspective Colin J. D. Greene, 2015-10-14 Christology defines the very heart of the Christian faith Traditionally the study of the person and work of Christ has been understood largely as an exercise in biblical exegesis or historical and doctrinal analysis Rarely if ever has Christology focused on the changing cultural paradigms that have deeply influenced the development of human knowledge and self understanding This unique volume by Colin Greene reverses that trend and in line with developments in modern cultural theory explores the interlaces between successive cultural contexts and the story of Jesus to which the Scriptures bear witness Starting with an examination of the three main Christological trajectories that have dominated the history of Christology cosmological Christology political Christology and anthropological Christology Greene proceeds to concentrate on the subtle and complex linkages between Christology and the sociopolitical paradigms that have bolstered the epistemological assumptions of modernity Greene s wide ranging study closes with a creative exploration into how Christology might once again provide us with a Christ centered vision of reality

Philosophy in Culture J. Tosam, Peter Takov, 2016-09-13 This book explores the symbiotic relationship between philosophy and culture Every philosophy emerges as a reaction to or as justification for a particular culture and it is for this reason that philosophy may differ from one culture to another It argues that philosophy is an essential part of every culture Philosophy is the means by which every culture provides itself with justification for its values beliefs and worldview and also serves as a catalyst for progress Philosophy critically questions and confronts established beliefs customs practices and institutions of a society As reflective critical thinking philosophy is linked to a way of life a form of enquiry intended to guide behaviour a form of thinking that sharpens and broadens our intellectual horizon scrutinizes our assumptions and clarifies the beliefs and values by which we live Philosophy helps to liberate the individual from the imprisonment of ignorance prejudice superstition narrow mindedness and the despotism of custom Culture constitutes the raw data the laboratory from which philosophers do their analytic experimentation Culture is considered as philosophy of the first order activity The book maintains that any genuine global philosophy must include philosophical traditions from all cultures and regions of the world as it is by seeking alternative philosophical answers to some of the thorniest problems facing humanity that we are most likely to find more lasting solutions to some global problems In this commitment to a universal humanity we cannot afford to depend on solutions from a single culture or from the most influential cultures
