Remaking Beijing Wu Hung, **A Guide to Spatial History** Konrad Lawson, Riccardo Bavaj, Bernhard

Struck, 2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research

Mao Cult Daniel Leese, 2011-10-31 Although many books have explored Mao's posthumous legacy none has scrutinized the massive worship that was fostered around him during the Cultural Revolution This book is the first to do so By analyzing secret archival documents Daniel Leese traces the history of the cult within the Communist Party and at the grassroots level The party leadership's original intention was to develop a prominent brand symbol which would compete with the nationalists elevation of Chiang Kai-shek However they did not anticipate that Mao would use this symbolic power to mobilize Chinese youth to rebel against party bureaucracy itself The result was anarchy and when the army was called in it relied on mandatory rituals of worship such as daily reading of the Little Red Book to restore order Such fascinating detail sheds light not only on the personality cult of Mao but also on hero worship in other traditions

China After Mao Frank Dikötter, 2022-11-15 A blow by blow account An important corrective to the conventional view of China's rise Financial Times From internationally renowned historian Frank Dikötter winner of the Samuel Johnson Prize a myth shattering history of China from the death of Chairman Mao to Xi Jinping Through decades of direct experience of the People's Republic combined with extraordinary access to hundreds of hitherto unseen documents in communist party archives the author of *The People's Trilogy* offers a riveting account of China's rise from the disaster of the Cultural Revolution He takes us inside the country's unprecedented four decade economic transformation from rural villages to industrial metropolises and elite party conclaves that vaulted the nation from 126th largest economy in the world to second largest A historian at the pinnacle of his field Dikötter challenges much of what we think we know about how this happened Casting aside the image of a society marching unwaveringly toward growth in lockstep to the beat of the party drum he recounts instead a fascinating tale of contradictions illusions and palace intrigue of disasters narrowly averted shadow banking anti corruption purges and extreme state wealth existing alongside everyday poverty He examines China's navigation of the 2008 financial crash its increasing hostility towards perceived Western interference and its development into a thoroughly entrenched dictatorship with a sprawling

security apparatus and the most sophisticated surveillance system in the world As this magisterial book makes clear the communist party's goal was never to join the democratic world but to resist it and ultimately defeat it *The Spirit of Cities* Daniel A. Bell, Avner de-Shalit, 2013-10-27 A lively and personal book that returns the city to political thought Cities shape the lives and outlooks of billions of people yet they have been overshadowed in contemporary political thought by nation states identity groups and concepts like justice and freedom The Spirit of Cities revives the classical idea that a city expresses its own distinctive ethos or values In the ancient world Athens was synonymous with democracy and Sparta represented military discipline In this original and engaging book Daniel Bell and Avner de Shalit explore how this classical idea can be applied to today's cities and they explain why philosophy and the social sciences need to rediscover the spirit of cities Bell and de Shalit look at nine modern cities and the prevailing ethos that distinguishes each one The cities are Jerusalem religion Montreal language Singapore nation building Hong Kong materialism Beijing political power Oxford learning Berlin tolerance and intolerance Paris romance and New York ambition Bell and de Shalit draw upon the richly varied histories of each city as well as novels poems biographies tourist guides architectural landmarks and the authors own personal reflections and insights They show how the ethos of each city is expressed in political cultural and economic life and also how pride in a city's ethos can oppose the homogenizing tendencies of globalization and curb the excesses of nationalism The Spirit of Cities is unreservedly impressionistic Combining strolling and storytelling with cutting edge theory the book encourages debate and opens up new avenues of inquiry in philosophy and the social sciences It is a must read for lovers of cities everywhere In a new preface Bell and de Shalit further develop their idea of civic pride city dwellers feel for their city and its ethos over that of others China's Youth Cultures and Collective Spaces Vanessa Frangville, Gwennaël Gaffric, 2019-09-10 Presenting the collaborative work of 13 international specialists of contemporary Chinese culture and society this book explores the spaces of creation production and diffusion of youth cultures in China among generations born since the 1980s Defining the concept of youth culture as practices and activities that catalyze self expression and creativity this book investigates the emergence of new physical spaces including large avenues parks shopping malls and recreation areas Building on this it also examines the influence of non physical places especially digital cultures such as online social networks shopping platforms Cosplay cyberliterature and digital calligraphy and argues that these may in fact play a more significant role in Chinese civil society today As an exploration of how youth can be creative even in a coercive environment China's Youth Cultures and Collective Spaces will be valuable to students and scholars of Chinese society as well those working on the links between space youth and culture **The Design of Protest** Tali Hatuka, 2018-08-02 Public protests are a vital tool for asserting grievances and creating temporary yet tangible communities as the world becomes more democratic and urban in the twenty first century While the political and social aspects of protest have been extensively studied little attention has been paid to the physical spaces in which protests happen Yet place is a crucial aspect of protests influencing the dynamics

and engagement patterns among participants In *The Design of Protest* Tali Hatuka offers the first extensive discussion of the act of protest as a design that is a planned event in a space whose physical geometry and symbolic meaning are used and appropriated by its organizers who aim to challenge socio spatial distance between political institutions and the people they should serve Presenting case studies from around the world including Tiananmen Square in Beijing the National Mall in Washington DC Rabin Square in Tel Aviv and the Plaza de Mayo in Buenos Aires Hatuka identifies three major dimensions of public protests the process of planning the protest in a particular place the choice of spatial choreography of the event including the value and meaning of specific tactics and the challenges of performing contemporary protests in public space in a fragmented complex and conflicted world Numerous photographs detailed diagrams and plans complement the case studies which draw upon interviews with city officials urban planners and protesters themselves
