Remaking Our Schools:

Remaking Our Schools for the Twenty-First Century Robert Arnold, 2013-07-01 If you are a teacher a parent a grandparent or just another taxpayer and you think the future of our country rests in a large part in the hands of our educational systems and you expect the schools to play a key role in raising our youth to become competent responsible citizens then you need to find out why that is not happening *Remaking Our Schools for the Twenty First Century* written by Robert L Arnold Professor of Education Emeritus provides an in depth analysis of these problems in our public schools Teachers are sick and tired of being forced to adopt and use irrelevant materials and developmentally inappropriate procedures along with a standardized testing program that makes no sense They want our youth to be excited about learning and ideas They need to know how drug abuse bullying and other serious problems are related to the disconnected and irrelevant school experiences being imposed on their students in the name of raising standards Our public schools need to develop far greater competency in general education and problem solving skills in all students Our democracy cannot be sustained much longer if upcoming generations continue to exhibit deficiencies in these areas Standardization is not the answer to problems The mass production and sale of a common core set of educational books tests and worksheets is required for corporate conglomerates to make huge profits on the backs of our students Standardization is part of the problem not part of the solution **Remaking Our Schools** Ed Pino, 1993 *American Education*, 1908 **The Allure of Order** Jal Mehta, 2015 In *The Allure of Order* Mehta recounts a century of attempts at revitalizing public education and puts forward a truly new agenda to reach this elusive goal Over and over again outsiders have been fascinated by the promise of scientific management and have attempted to apply principles of rational administration from above What we want Mehta argues is the opposite approach which characterizes top performing educational nations attract strong candidates into teaching develop relevant and usable knowledge train teachers extensively in that knowledge and support these efforts through a strong welfare state **Remaking the Modern World 1900 - 2015** C. A. Bayly, 2018-07-17 The sequel and companion volume to C A Bayly's ground breaking *The Birth of the Modern World 1780 1914* this wide ranging and sophisticated study explores global history since the First World War offering a coherent comparative overview of developments in politics economics and society at large Written by one of the leading historians of his generation an early intellectual leader in the study of World History Weaves a clear narrative history that explores the themes of politics economics social cultural and intellectual life throughout the long twentieth century Identifies the themes of state capital and communication as key drivers of change on a global scale in the last century and explores the impact of those ideas Interrogates whether warfare was really the pre eminent driving force of twentieth century history and what other ideas shaped the course of history in this period Explores the causes behind the resurgence of local conflict rather than global scale conflict in the years since the turn of the millennium Delves into the narrative of inequality a story that has shaped and

been shaped by the events of the last hundred years Part of The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production
