Remembering School Mapping Continuities In Power Subjectivity And Emotion In Stories Of School Life

Ian Grosvenor, Lisa Rosén Rasmussen

Remembering School Mapping Continuities In Power Subjectivity And Emotion In Stories Of School Life:

Remembering School Erica Southgate, 2003 What do people remember about their school experience What do the memories of generations of ex students have in common What do these memories tell us about the power relations and emotions produced by the institution of school What effect does school have on the formation of the self *Remembering School* uses a unique theoretical and methodological framework constructed from the theories of Michel Foucault and post structural feminism to explore the collective memory of school This book draws on a wide range of stories to explore memories of punishment bullying gender and race relations and pleasure Erica Southgate uses a clear often witty writing style to provide a provocative account of the enduring power relations of schooling and their lasting impact on people

Making Education: Material School Design and Educational Governance Ian Grosvenor, Lisa Rosén

Rasmussen, 2018-12-08 This book brings together the notions of material school design and educational governance in the first such text to address this critical interrelationship in any depth In addressing the issue of governance through analysing current and historical material school designs it looks at the intersection of politics economics aesthetics and pedagogical ideas and practices More specifically it explores and unfolds educational governance as it is constituted materialized and transformed in and through material school designs It does so by studying a range of issues from the material and aesthetic language of schooling to the design of the built environment from spatial organization to the furnishing and equipment of classrooms and from technologies of regulation to the incorporation of tools of learning The book presents examples from Europe Latin and Central America and the United States and relates to the past present and future of governance and school design It focuses on design processes and on designers architects and people involved in the planning of school design as well as on school leaders teachers and pupils adopting inhabiting and re shaping them in everyday school life Furthermore the book discusses how to study governance by material school design and how to act upon governance by material design on wishful actual and ethical terms *Re-theorizing Discipline in Education* Zsuzsa Millei (Ed), Tom G. Griffiths, Robert John

Parkes, 2010 understandings that can make a difference in students lives **Critical Readings in Teacher Education**

, 2008-01-01 Like other fields of study teacher education defines itself both by what it includes and by what it excludes Teacher educators and researchers have spent a great deal of time seeking and attempting to eradicate the flaws in existing structures and practices but significantly less time learning to perceive the absences The premise of this book is that until we can identify and begin to address what is absent teacher education will be constrained by a perennial recycling of concerns that have characterized so much of research policy and practice to date If teacher education is to have a different future we need to ask different and difficult questions This book with contributions from theorists in Australia Canada and the United States addresses the challenges we face in establishing a more hopeful future for teacher education The authors provocative contributions identify what is missing in teacher education while providing critical counterpoints to existing frames of

reference in the field In writing against the grain they open up new conceptual spaces and exciting trajectories for a different teacher education

Children's experiences of classrooms Eleanore Hargreaves, 2017-03-20 If children are to succeed and progress at school schools and teachers need to understand how children experience the classroom What do they think How does school make them feel This book brings together the author's work on children's classroom experiences in a variety of contexts The author uses student voice to show what children think of classrooms tasks tests and exams and how this impacts their experience of schooling Can the classroom experience be transformative for children's life chances or is it a trap Schools and teachers need to take account of student perspectives in the primary school to make it the best experience possible

Piety and Privilege Tom A. O'Donoghue, Judith Harford, 2021 For centuries the Catholic Church ran schools around the world but by the 20th century most countries had moved to a state school system Piety and Privilege shows Ireland as an exception with the state financing schools leaving the Church to promote practices aimed at salvation of souls and at the reproduction of a loyal middle class

Girls Becoming Teachers, [Towards Fairer University Assessment](#) Nerilee Flint, Bruce Johnson, 2010-12-07 After all the hours of studying reading and preparation the nights spent revising and the writing and re-writing of assignments success for university students can often be represented with a single grade or digit summing up a wide range of activities The authors of this timely book ask how fair that assessment is This book is about a long ignored determinant of student satisfaction concerning the perception of how fairly students are judged marked ranked and rewarded for demonstrating their capabilities at university In the high stakes competitive field of higher education students are increasingly positioned as customers whose views on their university experience are considered vitally important Yet paradoxically little research has been undertaken to find out more about how students decide whether they have been treated fairly and what they do about it This book fills a major gap in our understanding of these issues responding to four key questions Why is the assessment of students capabilities the core business of universities What are the main sources of student frustration with assessment arrangements What do students do when they think they have been treated unfairly What can be done to promote fair assessment at university In doing so this book goes beyond the superficial consideration of university assessment as a necessary requirement by unravelling the underlying issues that really count what is considered fair assessment and what is not Towards Fairer University Assessment will be of interest to higher education academics administrators and managers researchers in the areas of education policy and politics as well as advanced undergraduate and postgraduate students

Educational Research: Networks and Technologies Paul Smeyers, Marc Depaepe, 2007-12-03 Does IT poison the minds of the young Must educational institutions change to serve the needs of the twenty first century This book addresses these questions and more It records the intellectual struggles of a group of scholars coming to grips with changes in knowledge production and research communication Together these authors demonstrate how philosophical and historical approaches are relevant to the practice and theory of education
