Remembering The Future Imagining The Past Story Ritual And The Human Brain:

Remembering the Future, Imagining the Past David A. Hogue, 2009-07-01 Brain research is opening up our understanding of not only what role the different areas of our brain play in making decisions or in recognizing the faces of those we love but even in experiencing God As a pastoral theologian and counselor Hogue values and utilizes the significant resources of the brain sciences for the work of the church in guiding healing and challenging persons and systems informed by our current understanding of the central nervous system His latest book *Remembering the Future Imagining the Past* is an especially useful resource for all those persons concerned with the practical theological arts of preaching worship pastoral care and counseling as well as those interested in how our increasing knowledge of the ways in which our brains work can help us understand and tailor our spiritual and pastoral practices in the church *Re-embodiment Pastoral Theology* Johann Choi, 2024-05-29 With the dominance of psychotherapeutic theories and methods in the field of pastoral theology the typical pastoral encounter has been understood to be a private conference in which a pastor addresses a sufferer's thoughts and emotions What results is a kind of dualism that is contrary to a historically Christian affirmation of and concern for the body The phenomenon of moral injury further problematizes this model of pastoral care in part due to a greater awareness that trauma is imprinted as much in the body as in the mind *Re-embodiment Pastoral Theology* uses the problem of moral injury in veterans to propose a pastoral theology that recognizes ritual as the means by which the Christian community addresses the body in pastoral care In advancing this new approach to ritual care the author draws from the fields of psychology ritual studies liturgical studies and historical theology as well as the experiences of veterans throughout history This book endeavors to re-think the Christian approach to moral injury and re-embodiment the field of pastoral theology *Christian Moral Theology in the Emerging Technoculture* Brent Waters, 2016-05-23 We are living in an emerging technoculture Machines and gadgets not only weave the fabric of daily life but more importantly embody philosophical and religious values which shape the contemporary moral vision a vision that is often at odds with Christian convictions This book critically examines those values and offers a framework for how Christian moral theology should be formed and lived out within the emerging technoculture Brent Waters argues that technology represents the principal cultural background against which contemporary Christian moral life is formed Addressing contemporary ethical and religious issues this book will be of particular interest to students and scholars exploring the ideas of Heidegger Nietzsche Grant Arendt and Borgmann **Big Dreams** Kelly Bulkeley, 2016-03-02 *Big Dreams* is the first full scale cognitive scientific analysis of highly memorable dreams with an original theory about their formation function and meaning The book draws on evidence from religious studies psychology anthropology evolutionary biology and neuroscience to explore how big dreams are a wellspring of religious experience **Suffering in Worship** Armand Léon van Ommen, 2016-11-25 How does the universal experience of suffering relate to the experience of worship Questioning how Anglican liturgy welcomes people who are suffering *Suffering in*

Worship uniquely applies a narrative ritual model for the analysis of both the liturgical text and worship services themselves. In this book van Ommen draws on interviews with participants in worship as well as clergy. Highlighting several elements in the liturgy which address suffering including the Eucharist, songs, sermons and prayers of intercession, he shows the significance of a warm and safe liturgical community as a necessary context for suffering people to find consolation. This book also uses the concept of remembrance to plead for liturgy that attends to the suffering of both God and people. As such, it will be of interest to scholars of pastoral theology as well as clergy.

Evagrius Ponticus and Cognitive Science George Tsakiridis, 2010-01-15. This study puts the thought of Evagrius Ponticus, a fourth-century theologian, into dialogue with modern cognitive science in regard to the topic of evil, specifically moral evil. Evagrius, in his writings about prayer and the ascetic life, addressed the struggle with personal moral evil in terms of the eight thoughts or demons. These thoughts were transmitted by John Cassian to the Western church and later recast by Gregory the Great as the Seven Deadly Sins. Though present understandings of evil appear to differ greatly from those of Evagrius, his wisdom concerning the battle against evil may prove to be of great help even today. Using the work of Pierre Hadot to recover Evagrius's context and the work of Paul Ricoeur to discuss how we construct descriptions and myths of evil, Evagrius is brought into dialogue with the cognitive sciences. Using current research, especially the work of Eugene d'Aquili and Andrew Newberg, this study reveals the contemporary relevance of Evagrius' approach to combating evil. In addition, the interdisciplinary study of patristics and cognitive science opens the pathway to a better understanding between Christian tradition and the modern sciences.

Neuroscience and Christian Formation Mark A. Maddix, Dean G. Blevins, 2016-10-01. Why a text on neuroscience and Christian formation? Simply put, we need one that represents the range of possible intersections for today and into the future. In recent years, neuroscience's various fields of study have influenced our understanding of the person, memory, learning, development, communal interaction, and the practice of education. The book serves as an introductory textbook for Christian education formation professors to use in Christian education or Christian formation courses at the college or seminary level. The book is designed to provide an overview of how current research in neuroscience is impacting how we view Christian education and formation, with particular attention given to faith formation, teaching, development, and worship. The first four chapters discuss how neuroscience broadly influences Christian education and formation. Chapters five through eight explore how neuroscience informs specific formational practices, from personal meditation to intercultural encounter to congregational formation and worship. The last four chapters explore various aspects of neuroscience along developmental lines. The book also moves from conceptual overviews to more empirical studies later in the text. Each chapter of this book can also be read and discussed individually. Each author has provided both discussion topics/suggestions for future reading within neuroscience and discussion questions at the end of the chapter.

Sticky Learning Holly J. Inglis, 2014-11-01. Despite the introduction of new technologies for classrooms, many seminary courses still utilize primarily auditory methods to convey

content Course outcomes may include opportunities for learners to demonstrate knowledge and skills gained but may not include opportunities for learners to begin to embed knowledge and skills into their long term memory Educators are engaging with neuroscientists to reshape classroom practices content delivery curriculum design and physical classroom spaces to enhance students learning and memory primarily in elementary and secondary education Why not in seminary education An overview of how learning occurs in our brain what the different types of memory are and how memory is created serves as a framework for suggesting pedagogical tools These brain friendly tools are specifically applied to individual academic disciplines enabling instructors to make concrete modifications in the structure and content of what is taught making learning more sticky Inglis s synopsis of the use of neuroscience in the classroom and suggested action is followed by a collaborative dialogue with Kathy L Dawson and Rodger Y Nishioka Dawson and Nishioka provide practical commentary regarding the successful implementation of Inglis s proposed approach As a group Inglis Dawson and Nishioka create a text that extends pedagogical innovation in inspiring but practical ways

Sin Bravely Mark

Ellingsen, 2009-04-01 Mark Ellingsen dares you to go ahead and sin bravely In this refreshing and unique book he challenges the religious legalism pervasive throughout American evangelicalism today and encourages a new understanding of what it means to be both a Christian and a human being Equipped with the joyful rebellious vision of Martin Luther father of the Protestant reformation and the latest in neuroscientific research Ellingsen offers a new approach for healthy living one opposed to the duty oriented selfish and stifling conception of faith that has gained such a strong foothold in contemporary American culture It is an approach that fully embraces the active role that God s grace plays in each person s life and the fun and freedom one gains from it Beginning with the first theological analysis of Rick Warren s brand of Christianity this book

exposes the burdens and narcissism that purpose driven and duty bound living encourages and includes the purveyors of the Prosperity Gospel taught by such influential preachers like Joel Osteen in his critique Ellingsen writes that brave sinners aware of God's grace in their lives instead say no to narcissism and yes to healthy risk taking that gets beyond selfish desires to the desire to help one another When people sin bravely acknowledging that everything done is done in sin with God's saving grace acting upon them people can learn to recognize God This awareness leads to freedom and joy since the pressure is now removed to do and be good In addition total dependence on God entails a self forgetfulness that leads to happiness The more boldly someone acknowledges their sin in failing to take credit for the good they have done the more focused on God the individual becomes Correspondingly this self forgetful lifestyle is a promising counter cultural alternative to the cultural narcissism which so dominate in many segments of contemporary American society This book demonstrates both how and why brave sinning leads to joy and in so doing offers readers practical advice on living this way Ellingsen also cites recent neurobiological findings showing that when people forget themselves in order to focus on bigger projects the pleasure centers of the brain are stimulated and people become happier and more content It is this joyous risk taking that he suggests brings people closer together closer to God and closer to a better understanding of themselves Sin Bravely dares to be that joyful alternative to the purpose driven life
