Remodeled To Death:

Renovated to Death Frank Anthony Polito, 2022-05-31 It's Hart to Hart via HGTV in award winning author and playwright Frank Anthony Polito's fabulous new cozy mystery series featuring a gay couple who solve crimes while renovating houses in suburban Detroit as part of their hit reality show Domestic Partners. Real life domestic partners and stars and producers of the new hit reality home renovation show Domestic Partners bestselling mystery author Peter P.J. Penwell and actor JP Broadway are enjoying work and life in their sleepy Detroit suburb of Pleasant Woods until a suspicious death makes an unscripted appearance. After a successful first season of Domestic Partners chronicling the renovation of their historic Craftsman Colonial Peter and JP are taking on a renovation of a local Tudor Revival inherited by identical twin brothers Terry and Tom Cash. But linoleum floors and a pink tiled bathroom aren't the only unwelcome surprises awaiting inside the house. Just as the show is set to start filming Peter and JP discover Tom Cash dead at the foot of the house's staircase. And when the police ruling changes from accidental death to homicide the list of suspects grows fast. Could the killer be the crabby next door neighbor the Realtor ex boyfriend the bartender ex boyfriend the other much younger ex boyfriend or even renovation reluctant brother Terry. And what's that awful smell coming from the basement. Now Peter's mystery writer skills and JP's experience as the former star of a cop show will be put to the test as will their relationship while they uncover the secrets of the house and its owners. With a killer on the loose this is one fixer upper that may prove deadly.

Arterial Remodeling: A Critical Factor in Restenosis Antoine Lafont,Eric J. Topol,2012-12-06 Angioplasty has completely transformed the treatment of coronary artery disease and is widely used with more than 800 000 procedures performed worldwide per year However the enthusiasm for angioplasty is shadowed by restenosis which remains a critical problem after the procedure resulting in clinical recurrence in over a third of patients Recently the mechanisms of restenosis have been completely reappraised with an enriched understanding that the original concept of neointimal hyperplasia may not be accounting for the bulk of the problem There is a desperate need to heighten understanding of the remodeling process at the molecular cellular and arterial level Vascular remodeling is a well established concept in the field of atherosclerosis and hypertension but only in recent years has its applicability to the field of restenosis become pivotal Accordingly the editors perceived the need to assemble the first book dedicated to the concept of coronary artery remodeling in restenosis in order to clearly review the experiments leading to the remodeling hypothesis and integrate this with the neointimal hyperplasia tumor model for the development of the restenotic lesion The authors of this book present their experience to facilitate the understanding of the mechanisms for coronary restenosis and remodeling The various experimental models clinical issues and basic mechanisms are reviewed in detail resulting in a fresh approach to a vexing clinical problem Arterial

Remodeling A Critical Factor in Restenosis will be useful to the physician and trainee who have an interest in restenosis and specifically in the major pathophysiologic process which determines the fate of arterial healing in patients following percutaneous coronary revascularization It is hoped that this book will lay the foundation for more effective therapies that will reduce the chance of constrictive remodeling and improve the long term efficacy of non surgical coronary revascularization in the future Contemporary Challenges in Sudden Cardiac Death, An Issue of Cardiac Electrophysiology Clinics Mohammad Shenasa,N.A.
