Remote Access Networks And Services The Internet Access Companion:

Remote Access Networks and Services Oliver C. Ibe, 1999-04-19 Expert Oliver C Ibe provides you with the technical background you need to confidently select and implement the best remote access technologies for your company's network. He fills you in on everything you should know about how remote traffic is processed from source to network and the technologies, services, and protocols it is likely to encounter along the way. He also acquaints you with all the remote access devices currently on the market and describes in detail how each will perform with legacy networking services and technologies. With the help of numerous illustrations and time flow diagrams and a complete glossary of technical terms, he provides clear, detailed coverage of xDSL, HFC, FTTC, FTTH, and other broadband access technologies. Remote access performance with legacy and emerging technologies and services. Remote access network security including basic security services, cryptographic systems, IP security protocols, and Web security. Firewalls and firewall architectures. Virtual Private Network (VPN) architectures and implementations. VPN applications including intranets, extranets, and voice over IP. Wireless remote access services. Mobile data networking including CDPD, mobile IP, and short message services. **Security Sage's Guide to Hardening the Network Infrastructure** Steven Andres, Brian Kenyon, Erik Pack Birkholz, 2004-05-05 This is the only computer book to focus completely on infrastructure security: network devices, protocols, and architectures. It offers unique coverage of network design so administrators understand how they should design and protect their enterprises. Network security publishing has boomed in the last several years with a proliferation of materials that focus on various elements of the enterprise. This is the only computer book to focus completely on infrastructure security: network devices, protocols, and architectures. It offers unique coverage of network design so administrators understand how they should design and protect their enterprises. Helps provide real practical solutions and not just background theory.
