The Unknowns Gabriel Roth, 2013-07-02 Eric Muller has been trying to hack the girlfriend problem for half his life As a teenage geek he discovered his gift for programming computers but his attempts to understand women only confirm that he's better at writing code than connecting with human beings Brilliant neurotic and lonely Eric spends high school in the solitary glow of a screen By his early twenties Eric's talent has made him a Silicon Valley millionaire He can coax girls into bed with ironic remarks and carefully timed intimacies but hiding behind wit and empathy gets lonely and he fears that love will always be out of reach So when Eric falls for the beautiful fiercely opinionated Maya Marcom and she miraculously falls for him too he's in new territory But the more he learns about his perfect girlfriend's unresolved past the further Eric's obsessive mind spirals into confusion and doubt Can he reconcile his need for order and logic with the mystery and chaos of love This brilliant debut ushers Eric Muller's flawed funny irresistibly endearing into the pantheon of unlikely heroes With an unblinking eye for the absurdities and horrors of contemporary life Gabriel Roth gives us a hilarious and heartbreaking meditation on self consciousness memory and love
