Subcommittee on Africa, Global Human Rights, and International Operations, 2006 From the Active to the Enabling State E. Page, V. Wright, 2006-10-24 This book surveys the changing role of senior civil servants in Western Europe and explores whether they have kept their central role in government decision making Looking at these issues in comparative perspective the contributors provide an insight into the causes and consequences of the changing role of officials **World Economic and Financial Surveys** International Monetary Fund, 1990-01-01 This paper discusses commodity prices might serve as a useful leading indicator of inflation based on the relative importance of flexible auction markets for the determination of these prices They thus may have a tendency to respond relatively quickly especially in response to monetary disturbances Estimation of alternative commodity price indexes in which the weights are chosen so as to minimize the residual variance in aggregate inflation regressions was not fully successful The commodity prices do have a useful role to play as an aid in predicting inflation so long as one is careful to interpret the relationships qualitatively and in the context of more general macroeconomic developments The ratio of consumer to commodity price movements changes over time and the relative price of commodities undergoes long sustained swings nonetheless the qualitative linkages are quite evident in the data Perhaps most importantly turning points in commodity price inflation frequently precede turning points in consumer price inflation for the large industrial countries as a group *The New Ordeal by Planning* NA NA, 2015-12-25 *Hearings* , 1957 Responsiveness and Responsibility in the Euro Crisis Lisa Kriegmair, 2025-04-01 Conditionality has become a popular instrument for achieving policy change in the European Union EU EU conditionality in the Euro crisis epitomises the responsiveness responsibility dilemma that comes with increasing supranational influence on national policymaking governments find it increasingly difficult to responsively address the needs of their citizens and simultaneously fulfil their obligations vis vis supranational institutions Blame avoidance strategies are a way to mitigate this problem as they help governments shape public perceptions about who is to be held accountable for unpopular policies During the Euro crisis despite it being an easy target governments facing EU conditionality did not indiscriminately shift blame to the EU Instead they drew on a variety of blame avoidance strategies This book aims to shed light on this observed variation in governments strategy choices during the Euro crisis To do so it investigates the constraints that EU conditionality imposes on governments use of blame avoidance strategies and how governments chose specific strategies from the remaining blame avoidance toolkit Angeles National Forest (N.F.), Elsmere Solid Waste Management Facility, Angeles National Forest (N.F.)
