Macintosh Desktop Typography John Baxter, 1986 **Typography** Paul Luna, 2018-11-15

Typography the art of designing printed words was once the domain of an elite few artists but has become an area with which millions of people engage daily. The widespread usage of digital devices from laptops to tablets and smart phones which are used for written communications means that we are regularly asked to make decisions about the fonts sizes and layouts we use in our writing. This broadening engagement with the field of typography has led to a perceptible shift from debates about legibility and technicalities to conversations about which fonts best reflect the writer's personality or style. In this Very Short Introduction Paul Luna offers a broad definition of typography as design for reading whether in print or on screens where a set of visual choices are taken to make a written message more accessible more easily transmitted more significant or more attractive. Considering the development of letterforms and the shapes of letter we use Luna discusses the history behind our modern day letters and fonts before considering the issues behind key typographic decisions and the differences between printed and on screen typography. Presenting any piece of typography as a fundamental design choice Luna introduces the options available today and explores the reasons why key typographic decisions are made.

ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket sized books are the perfect way to get ahead in a new subject quickly. As If By Chance Kevin Reed Donley, 2023-12-21

The age of print was begun by Johannes Gutenberg in 1440 in Mainz Germany. His invention of the mechanized and mass production of print replaced the previous handwriting of the scribes and was a transformative achievement. It was both the product of and a catalyst for far reaching intellectual social and political changes that began during the Renaissance and continued for centuries right up to the present. The age of electronic media was begun by Steve Jobs in 1985 in Cupertino California. His integration of the elements of desktop publishing personal computer page layout software page description language and laser printer replaced the previous photomechanical processes of printing and was a transformative achievement. It was both the product of and a catalyst for the intellectual social and political changes during the digital revolution that will extend for generations into the future. This book discusses these two bookends in the age of print. It follows the transitions and stages of innovation in printing between the fifteenth and twenty first centuries and shows how the inventors responsible for this progress are bound together in a chain of revolutionary technical change called disruptive continuity. While the works of Gutenberg and Jobs are separated by more than five centuries there are striking parallels and differences between these two innovations. They both sparked the quantitative expansion of literacy and the spread of knowledge around the world. However the emergence of electronic publishing especially in its present day social media forms has brought a vast increase in the consumption of information while also heralding a qualitative transformation.

that places the tools of wireless and mobile multimedia publishing into the hands of billions of people on earth Much in the same way that there was a historical lag between Gutenberg's invention and the full impact of printing on the world so too in our own time the long term societal consequences of electronic publishing have yet to be realized
