

The background of the cover features a stylized globe with a grid of latitude and longitude lines. The globe is semi-transparent, revealing a vibrant, multi-colored aurora (green, blue, and purple) at the bottom. Several bright, out-of-focus star-like lights are scattered across the dark space background.

Macmillan Essential World Atlas:

Macmillan Essential World Atlas, 2005 This atlas contains more than 200 maps the latest cartographic data and over 35 000 place names It has a comprehensive regional map collection as well as three dimensional maps **Rhumb Lines and Map Wars** Mark Monmonier, 2010-11-15 In **Rhumb Lines and Map Wars** Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator's legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth's roundness As Monmonier shows mariners benefited most from Mercator's projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection's popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the uses and limitations of one of cartography's most significant innovations With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps **Rhumb Lines and Map Wars** is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time
