Alexander, 1987-01-01 The work of fifteen nationally and internationally known theorists in sociology this volume demonstrates an exciting new trend in sociological thinking Each essay proposes a link between the two distinguishable traditions of sociological theory the microscopic which stresses the self and the interaction among persons and the macroscopic which concentrates on the institutional cultural and societal levels Each mode of analysis has had its champions and the proponents of each have often taken positions of polemic opposition to one another Micro-Macro Links and Microfoundations in Sociology Vincent Buskens, Werner Raub, Marcel Van Assen, 2014-07-16 *Micro Macro Links and Microfoundations in Sociology* focuses on two main issues in sociology Firstly how macro conditions can explain macro outcomes mediated by actor behaviour at the micro level micro macro links Secondly how alternative micro models affect macro outcomes microfoundations The contributions reflect key features of micro macro modelling in sociology as well as recent progress in this field The chapters address core features of explanations of social phenomena using micro macro models the problem of cooperation heterogeneity of actors structural balance opinion formation segregation and problems of micro macro models that are based on rational choice assumptions Moreover the contributions show how different research methods can be applied fruitfully such as laboratory experiments equilibrium analysis and agent based modelling As a result the book can be a guide for graduate students who

Advances in Social Theory and Methodology Karin Knorr-Cetina,A. V. Cicourel,2014 After a period in which sociology was torn apart by the polarized claims of micro and macro methodology an increasing number of sociologists are now attempting a fusion of the two approaches In this volume some of the most distinguished sociologists set out possible resolutions of the debate Each of the chapters placed in perspective by the editors prologue approaches the problem from a unique angle Aaron Cicourel argues for a macro basis of social interaction Randall Collins shows how the macro consists of an aggregate of micro episodes Troy Duster presents a methodological model for generating a systematic data base across different contexts of social action through his examination of the procedures governing screening for inherited disorders Rom Harr launches a philosophical attack on what he sees as a spurious bifurcation of micro and macro levels Anthony Giddens explores the problem of unintended consequences and Gilles Fauconnier through a depiction of Jesuitical casuistry shows how vital clues to macro structure can be elicited from the micro phenomenon of language Victor Lidz continues the language theme in his chapter on the implications of advances in linguistic theory for macro systems theory Niklas Luhmann illustrates the micro macro problem by the communication about law in interaction systems The theory of historical

materialism is reassessed by Jürgen Habermas Taking the example of Renault and electric vehicles Michel Callon and Bruno Latour investigate how micro actor status is attained and the sociologists involvement in this transformation Finally Pierre Bourdieu writing on men and machines analyses the historical imperatives that create the complex relation between man and his environment
