Macroeconomic Determinants Of International Migration In Europe Population Stories:

Macro-economic Determinants of International Migration in Europe Roel Peter Wilhelmina Jennissen, 2004 Discusses macro economic determinants of international migration in Europe Forecasting International Migration in Europe: A Bayesian View Jakub Bijak, 2010-10-23 International migration is becoming an increasingly important element of contemporary demographic dynamics and yet due to its high volatility it remains the most unpredictable element of population change In Europe population forecasting is especially difficult because good quality data on migration are lacking There is a clear need for reliable methods of predicting migration since population forecasts are indispensable for rational decision making in many areas including labour markets social security or spatial planning and organisation In addressing these issues this book adopts a Bayesian statistical perspective which allows for a formal incorporation of expert judgement while describing uncertainty in a coherent and explicit manner No prior knowledge of Bayesian statistics is assumed The outcomes are discussed from the point of view of forecast users decision makers with the aim to show the relevance and usefulness of the presented methods in practical applications **International Migration and the Future of Populations and Labour in Europe** Marek Kupiszewski, 2013-02-11 The changes of populations are determined by fertility mortality and migration On the national level international migration is a factor of increasing demographic economic social and political importance This book addresses the debate on the impact of international migration and economic activity on population and labour force resources in future It presents a study conducted for 27 European countries looking 50 years ahead 2002 2052 An extended discussion of theories and factors underlying the assumed evolution of the components of change and economic activity is included as well as a detailed analysis of the historical trends These theoretical and empirical considerations lead to defining scenarios of future mortality fertility economic activity and international migration which have been fed into a projection model producing various future population dynamics and labour force trajectories In addition simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe The results presented in this book allow researchers governments and policy makers to evaluate to what extent various migration and labour market policies may be instrumental in achieving the desired population and labour size and structures The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view **Polish Migrants in European Film 1918-2017** Kris Van Heuckelom, 2019-04-23 This study explores the representation of international migration on screen and how it has gained prominence and salience in European filmmaking over the past 100 years Using Polish migration as a key example due to its long standing cultural resonance across the continent this book moves beyond a director oriented approach and beyond the dominant focus on postcolonial migrant cinemas It succeeds in being both

transnational and longitudinal by including a diverse corpus of more than 150 films from some twenty different countries of which Roman Pola ski s The Tenant Jean Luc Godard s Passion and Krzysztof Kie lowski s Trois couleurs Blanc are the best known examples Engaging with contemporary debates on modernisation and Europeanisation the author proposes the notion of close Otherness to delineate the liminal position of fictional characters with a Polish background Polish Migrants in European Film 1918 2017 takes the reader through a widerange of genres from interwar musicals to Cold War defection films from communist era exile right up to the contemporary moment It is suitable for scholars interested in European or Slavic studies as well as anyone who is interested in topics such as identity construction ethnic representation East West cultural exchanges and transnationalism

The African Diaspora in the United States and Europe John A. Arthur, 2016-04-01 This book systematically documents the experiences of Ghanaian communities in North America as a case study of the new African migration The rapid increase in the number of Ghanaians lawfully admitted as permanent residents since 1980 offers an opportunity to investigate their immigrant journeys their membership in the larger society and the expression of their individual and collective social identities Using original empirical data from the US and Canada as well as comparative material from the UK and the Netherlands the author also investigates the relationship between these new African migrants and the native born black diaspora in the US This study balances theoretical insight with policy implications using the case study as a lens not just on African migration but also on significant conceptual themes in migration studies including transnationalism identity social networks remittances economic integration and citizenship

Postwar Migration in Southern Europe, 1950-2000 Alessandra Venturini, 2004-07-26 Managing migration promises to be one of the most difficult challenges of the twenty first century It will be even more difficult for south European countries from which emigration has levelled off and to which immigration has become a significant economic issue Southern Europe is close to other regions where the pressure to emigrate is intense these regions have a high level of unemployment above the European Union average and a large informal sector often 15 25 per cent of their economies as a whole This book analyses the southern European migration case using an economic approach It combines a theoretical and an empirical approach on the fundamental migration issues the decision to migrate effects on the country of departure and country of destination and the effectiveness of policies in managing migration It also explores the transformation due to migration of southern European countries in the 1980s and 1990s

The Macroeconomics of Open Economies Under Labour Mobility George M Agiomirgianakis, 2019-05-29 First published in 1999 this study recognises the importance of international labour mobility for modern economics This is in large part due to its effects on the size age structure and skills of the labour force the human flow between countries and the expected rise in scale as a result of income differentials demographic pressures and differential labour force growth rates along with developments in transport and communications These migrations are increasingly volatile and unpredictable whilst being concentrated in regions like Australia the USA Sub Saharan Africa and Western Europe Given the extensive literature on the microeconomic view George M Agiomirgianakis aims to extend the debate on open economy macroeconomics through an exploration of international labour mobilities and their effects on open economies with flexible
