quantitative as well as qualitative answers to pressing policy questions Because of advances in computational methods quantitative estimates are now derived from coherent nonlinear dynamic macroeconomic models embodying measures of risk and calibrated to capture specific characteristics of real world situations This text shows how such models can be made accessible and operational for confronting policy issues The book starts with a simple setting based on market clearing price flexibility It gradually incorporates departures from the simple competitive framework in the form of price and wage stickiness taxes rigidities in investment financial frictions and habit persistence in consumption Most chapters end with computational exercises the Matlab code for the base model can be found in the appendix As the models evolve readers are encouraged to modify the codes from the first simple model to more complex extensions Computational Macroeconomics for the Open Economy can be used by graduate students in economics and finance as well as policy oriented researchers

Macroeconomic Policy in Open Economies Michelle Fratianni, Dominick Salvatore, Juergen von Hagen, 1997-05-28

Focusing on the international dimension of macroeconomic policy this handbook covers the main areas of modern macroeconomic policy in open economies The emphasis is on policy applications rather than the development of economic theory There are three basic goals 1 an understanding of how economic theories affect actual policy making 2 a description of the institutional and conceptual development of the international economy and 3 an explanation of the way policy making institutions deal with the so called international economy The handbook consists of an introductory chapter and four parts The first treats macroeconomic policy making from the home country versus the rest of the world perspective The second part stresses policies among interacting and reacting countries The third part considers the development of world capital markets and the international monetary system as important parts of the policy environment The final part details macroeconomic policies in the G7 and Latin American countries

Open-Economy Macroeconomics Helmut Frisch, Andreas Worgotter, 2016-07-27 The integration of market economies is one of the most remarkable features of international economics which has important implications for macroeconomic performance in open economies Equally important is the declining relevance of the real versus the monetary theory dichotomy These papers focus on those aspects of monetary policy which relate to credibility and non neutrality the domestic adjustment to foreign shocks the interdependence of open economies and their strategic interactions An important section is also devoted to the innovative modelling of exchange rate dynamics

The Open Economy Macromodel: Past, Present and Future Arie Arnon, Warren Young, 2012-12-06 The impetus for the conference that was the basis for this volume emanated from the influence of two brilliant minds Egon Sohmen and Adam Klug who both died at an early age leaving their families and the professions of economics and economic history with major voids In the course of research on the origins of Open Economy Macroeconomics the significant contributions of Egon Sohmen came to the fore After correspondence with some of those involved in the early development of the Open Economy Macromodel we turned to Adam Klug for his views on the matter as he had dealt with the history of intertemporal trade

models in his Ph D thesis And it was Adam who suggested the idea of a conference bringing together economists and economic historians At this point we want to acknowledge the very generous grant from the Egon Sohmen Foundation and the active participation of Dr Helmut Sohmen and Mrs Renee Sohmen at the conference We also want to thank Prof Sir Aaron Klug Nobel Laureate and the Klug family for their support and the financial contribution of the Adam Klug Memorial Lecture Fund at Ben Gurion University Other institutions that contributed to the conference were the Gianni Foundation Bank of Israel University of North Carolina Department of Economics Faculty of Social Science and Aharon Meir Center for Banking Bar Ilan University Department of Economics and Faculty of Social Science Ben Gurion University of the Negev **Open**
