Macroeconomics David Greenaway, G. K. Shaw, 1986 *Macroeconomic Theory and Policy* Richard G. Lipsey, 1997

Macroeconomic Theory and Policy is the second collection of Richard G Lipsey's essays and contains material that has previously remained unpublished or has not been widely available. The book considers the macroeconomic issues of unemployment, inflation, and policies to combat inflation, the Keynesian macroeconomy, and supply side economics. The book begins with a new autobiographical introduction to the intellectual development, personal achievements, and the fields of interest of Richard G Lipsey and is then divided into five parts. Part one considers the Phillips Curve, wage rates, and profits. The second part discusses the various theories of the causes of inflation and explores issues such as the depreciation of money, monetarism, and cost push versus demand pull inflation. Part three looks at anti inflation policies focusing on incomes policies, credit and monetary policy, and wage price controls among other issues. Keynesian macroeconomics is evaluated in the fourth section, as well as inflation and the national income model. The final part considers supply side economics. Macroeconomic Theory and Policy is an essential reference companion to the work of Richard G Lipsey, one of the most important economists of our generation.

The book uses the 1944 Bretton Woods Conference as a unifying theme to relate the many controversial issues. It is written in a lively manner to bring real world events into the discussion of all of the concepts, topics, and policy issues. There is also emphasis on the history of economic thought in order to explain how economists in different time periods dealt with international financial issues.
