Pierson, 2013-11-21 *Breaking Bad* Critical Essays on the Contexts Politics Style and Reception of the Television Series edited by David P. Pierson explores the contexts politics and

style of AMC's original series *Breaking Bad*. The book's first section locates and addresses the series from several contemporary social contexts including neo liberalism its discourses and policies the cultural obsession with the economy of time and its manipulation and the epistemological principles and assumptions of Walter White's criminal alias Heisenberg. Section two investigates how the series characterizes and intersects with current cultural politics such as male angst and the re emergence of hegemonic masculinity the complex portrayal of Latinos and the depiction of physical and mental impairment and disability. The final section takes a close look at the series distinctive visual aural and narrative stylistics. Under examination are *Breaking Bad*'s unique visual style whereby image dominates sound the distinct role and use of beginning teaser segments to disorient and enlighten audiences the representation of geographic space and place the position of narrative songs to complicate viewer identification and the integral part that emotions play as a form of dramatic action in the series.

The Liberation of Life Charles Birch, John B. Cobb, 1985-01-10 This book is about the liberation of the concept of life from the bondage fashioned by the interpreters of life ever since biology began and about the liberation of the life of humans and non humans alike from the bondage of social structures and behaviour which now threatens the fullness of life's possibilities if not survival itself. It falls into a tradition of writings about human problems from a perspective informed by biology. It rejects the mechanistic model of life dominant in the Western world and develops an alternative ecological model which is applicable to the life of the cell and the life of the human community. For the first time it brings together in one work the insights of modern biology with those of a modern holistic philosophy and a liberal theology in a way which challenges conventional approaches to science agriculture sociology politics economics development and liberation movements.

Make Brilliant Work Rod Judkins, 2021-06-10 Everyone would benefit from reading Judkins if only because he is so entertaining packed with counterintuitive insights and hard truths. Psychology Today *Make Brilliant Work* is an inspiring guide to unlocking your creative potential showing you the methods and techniques that will transform your efforts and help you achieve your best ever work. You don't have to be brilliant to produce brilliant work. Many of the characters you will meet in this book failed at school lacked natural talent were not especially gifted or were repeatedly sacked. But their methods produced brilliant work and they will work for you too. *Make Brilliant Work* is the essential book from Rod Judkins author of the international bestseller *The Art of Creative Thinking*. Whatever your creative endeavour you might find it hard to produce something significant and important. The real life heroes in this book will show you how to make the transformation from ordinary to extraordinary. From Frida Kahlo to Steve Jobs and star architect Zaha Hadid the figures in *Make Brilliant Work* will show you how to think for yourself take risks and persevere to create brilliant work. Whatever your creative hang up Rod Judkins has steps you can take now. An admirably straightforward no nonsense guide to getting over yourself and getting to work. Mason Currey author of *Daily Rituals* *How Artists Work*. [Collected Works of George Grant](#) Arthur Davis, Henry Roper Roper, Sheila Grant, 2009-02-28 George Grant 1918-88 has often been called Canada's

greatest political philosopher and his work continues to influence the country's political, social and cultural discourse and institutions. The fourth and final volume of the *Collected Works of George Grant* contains his writings from the last period of his life and includes unpublished material such as lectures, interviews and excerpts from his notebooks. With comprehensive annotations for his articles, reviews and the three books he published during this period: *Time as History*, *English Speaking*, *Justice and Technology* and *Justice*, the volume also contains his writings on Nietzsche, Heidegger, Simone Weil and C. line that were central to this phase of his thought. Volume 4 reveals his engagement with technology and the nature of technological society that is as insightful today as during Grant's lifetime and is lasting proof of his legacy.

Arthur Davis is Associate Professor in the School of Social Sciences, Atkinson Faculty of Liberal and Professional Studies, York University. During the 1950s he studied undergraduate philosophy with George Grant.

More and Different Philip W. Anderson, 2011. Named a Top Five Book of 2012 by *Physics Today* USA. Philip Anderson was educated at Urbana High School in Urbana, Illinois, at Harvard (BS 1943, PhD 1949) and further educated at Bell Laboratories where his career (1949-1984) coincided with the greatest period of that remarkable institution. Starting in 1967 he shared his time with Cambridge University until 1975 and then with Princeton where he continued full time as Joseph Henry Professor until 1997. As an emeritus he remains active in research and at press time he was involved in several scientific controversies about high profile subjects in which his point of view, though unpopular at the moment, is likely to prevail eventually. His colleagues have made him one of the two physicists most often cited in the scientific literature for several decades. His work is characterized by mathematical simplicity combined with conceptual depth and by profound respect for experimental findings. He has explored areas outside his main discipline: the quantum theory of condensed matter for which he won the 1977 Nobel Prize; on several occasions his paper on what is now called the Anderson-Higgs mechanism was a main source for Peter Higgs' elucidation of the boson; a crucial insight led to work on the dynamics of neutron stars, pulsars; and his concept of the spin glass led far afield to developments in practical computer algorithms and neural nets and eventually to his involvement in the early years of the Santa Fe Institute and his co-leadership with Kenneth Arrow of two influential workshops on economics at that institution. His writing career started with a much-quoted article in *Science* titled *More is Different* in 1971; he was an occasional columnist for *Physics Today* in the 1980s and 1990s. He was more recently a reviewer of science and science-related books for the *Times* London, *Higher Education Supplement* as well as an occasional contributor to *Science*, *Nature* and other journals.

Our Knowledge of the External World Bertrand Russell, 1914. *Governmentality Studies in Education*, 2009-01-01. Michel Foucault's concept of governmentality originated in a lecture series in the late 1970s at the Collège de France and soon became the basis for a range of historical and contemporary studies across the social sciences and humanities. The concept in part rests on a simple but powerful idea that links government to the freedom of the subject in a novel understanding of liberal politics. It also provides an analytics of power based on the examination of actual practices. This is the first collection to

use Foucault's concept in relation to the field of education where it has a natural home given that much educational theory and practice in the liberal tradition at least since Kant has been directed at the goals of autonomy and self government. The volume has three sections: a general section on Foucault and governmentality with contributions from some of the world's leading scholars in the area including Colin Gordon, Jacques Donzelot and Thomas Lemke; and two sections devoted to governmentality and education: the first outlining Anglo-American perspectives, the second focusing on European perspectives with contributions from leading scholars such as Tom Popkewitz, James Marshall, Tom Osborne, Michael Peters, Mark Olssen, Tina Besley, Hermann J. Forneck, Bernadette Baker, Susan Weber, Susanne Maurer, Linda Graham and Maarten Simons and Jan Masschelein among many others.

The Foundation of Reality David Glick, David A. Glick, George Darby, Anna Marmodoro, 2020. Are space and time fundamental features of our world or might they emerge from something else? The Foundation of Reality brings together metaphysicians and philosophers of physics working on space, time and fundamentality to address this timely question. Recent developments in the interpretation of quantum mechanics and the understanding of certain approaches to quantum gravity have led philosophers of physics to propose that space and time might be emergent rather than fundamental. But such discussions are often conducted without engagement with those working on fundamentality and related issues in contemporary metaphysics. This book aims to correct this oversight. The diverse contributions to this volume address topics including the nature of fundamentality, the relation of space and time to quantum entanglement and space and time in theories of quantum gravity. Only through consideration of a range of different approaches to the topic can we hope to get clear on the status of space and time in our contemporary understanding of physical reality.
