Higgins, 2023-02-02 Between Brexit efforts to Make America great again and ongoing appeals for patriotic consumption to boost economies the intersection between national identity marketing campaigns and consumer choices has been brought to the fore This book maps out this terrain and provides a framework for how research on Made in campaigns and programmes in individual countries can be placed into a broader historical context The book argues that the history of Made in can be used to shed light on society at large the actors that have promoted it the institutions that have regulated it and the cultural environments that have attributed it meaning At times Made in has been a basic descriptive trade mark while in other periods it has been a key component of carefully developed commercial brands and in yet other instances it has been used in attempts to forge and redefine national identities The book opens with an introduction to the three key factors which have featured prominently in Made in campaigns commercial logic national economic policy and its use as an instrument in political discourse and it provides an overview of the evolution of Made in from a marketing perspective This is followed by country specific discussions of Made in with case studies including countries in Western Europe the US Japan and the antipodes This book will be of significant interest to students and scholars of economic history business history and marketing Chapter 7 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *1951-2001* Luigi Settembrini, 2001 A sincere tribute to the world renowned

Becoming couture Chiara Faggella, 2024-12-03 Becoming couture is the first book to examine the history of the Italian fashion industry during the global transition brought about by the Second World War It draws on a wide range of primary sources some of them newly unearthed to demonstrate that the Italian fashion industry in the Republican era continued to rely on business practices and professionals established during Fascism Analysing changes in promotional discourses and press coverage the book traces the shift that occurred when manufacturers were encouraged to expand their exports of accessories to include sportswear knitwear and moda boutique This ultimately led to the legitimisation of Italian dressmaking as creatively independent of French influences and therefore worthy of the label couture

Italian Imprints on Twentieth-Century Architecture Denise Costanzo, Andrew Leach, 2022-05-19 Italian architecture has long exerted a special influence on the evolution of architectural ideas elsewhere from the Beaux Arts academy s veneration of Rome to modernist and postmodern interest in Renaissance proportion Baroque space and Mannerist ambiguity This book critically examines this enduring phenomenon exploring the privileged position of Italian architects architecture and cities in the architectural culture of the past century Questioning the deep rooted myth of Italy within architectural history the book presents case studies of Italy s powerful yet problematic position in 20th century architectural ideologies at a time when established Eurocentric narratives are rightly being challenged It reconciles the

privileged position of Italian architecture and design with the imperative to write history across a more global diverse heterogenous cultural geography Twenty chapters from distinguished international scholars cover subjects and architects ranging from Alberti to Gio Ponti Aldo Rossi Manfredo Tafuri Vittorio Gregotti cities from Rome and Venice to Milan and an array of international architects movements and architectural ideas influenced by Italy The chapters each question where how and why the disciplinary edifice of 20th century architecture its canon of built visual textual and conceptual works relied on Italian foundations examining where and how those foundations have become insecure Indispensable for students and scholars of both Italian and global architectural history Italian Imprints on Twentieth Century Architecture provides an opportunity to consider the architectural and urban landscape of Italy from substantially new points of view Television Policies of the Labour Party 1951-2001 Des Freedman,2004-08-02 Des Freedman explores Labour s divided response to the development of commercial television in the 1950s and assesses the impact of Wilson s governments on television in the 1960s His key argument is that Labour has always been a vigorous but ultimately unreliable advocate of television *EAGE, 1951-2001* European Association of Geoscientists and Engineers,2001 Who's who in Italy ,2007 *The International Organization for Migration, 1951-2001* Marianne Ducasse-Rogier,International Organization for Migration,2001 The International Organization for Migration IOM is a global intergovernmental agency which aims to promote balanced migration carried out with respect for human rights and the rule of law This book charts the history of the organisation over the last fifty years and provides a broad overview of the IOM s origins development and programmes It considers how the changes in migratory patterns have challenged governments and societies particularly in recent years It discusses the themes and elements that have remained constant and which in many cases are receiving renewed attention These include migration as an engine for social and economic development and the importance of research and communication to the effective management of migration *Il Modo Italiano* Montreal Museum of Fine Arts,2006 Italian design marked a highly distinctive mark on the way that the form of objects is perceived in contemporary society Italian design has spanned the whole of the twentieth century leaving a highly distinctive mark on the way that the form of objects of everyday use is perceived in industrial and contemporary society This Italian way has succeeded through a complex and hesitant process of industrial innovation and technological updating in developing an independent and multifaceted culture of design capable of marrying the country s rich craft tradition with an often fiercely resisted aspiration to modernity made up of flashes of improvisation and irony and associated with an arduous bent for experimentation In this sense the history of Italian design has not yet been subjected to an exhaustive interpretation of the cultural and artistic dimensions of the phenomenon and in particular little has been said so far about the synergy between artistic experimentation and innovative design that has characterized it throughout the twentieth century The exhibition and this catalogue set out to offer a first overview of these links through an exploration of the different ways of seeing interpreting and representing industrial society in Italy on the

part of the architects artists and designers who lived through its emergence and who to some extent invented it The exhibition with around 400 works chosen from among the most representative of artistic research and the culture of design in Italy in the twentieth century is arranged chronologically with four sections that define the different periods in the philosophical economic and aesthetic discourse that has accompanied the recent history of art and design in Italy The survey brings to light the philosophies of design and the aesthetics that found a strong and dialectical expression right through the last century in Italy and that are at the root of the country's characteristic and lively cultural debate between art and design This catalogue is published in conjunction with *Il modo italiano Italian Design and Avant garde in the 20th Century* an exhibition produced by the Montreal Museum of Fine Arts in collaboration with the Royal Ontario Museum Toronto and the Mart Museo di Arte Moderna e Contemporanea di Trento e Rovereto **Interiors**, 2001-04 Un oceano di stile AA.
