history parenting and social organization      **Hunting the Faster than Light Tachyon, and Finding Three Unicorns and a Herd of Elephants** Robert Ehrlich, 2022-05-18 In 1905 Albert Einstein declared speeds greater than light to be impossible This book describes the author's decades long search for the hypothetical subatomic particles known as tachyons that violate this principle This book is a scientific detective story The crime is speeding that is the possible breaking of the cosmic speed limit namely the speed of light as stipulated by Einstein This detective story is also a memoir written by a member of a band of tachyon hunters The author's pursuit of tachyons has been met with skepticism from most physicists who note correctly that no such superluminal particles have ever been surely observed and that there have been many false sightings Nevertheless considerable circumstantial evidence for tachyons has already been published and an ongoing experiment could decide the issue in the next few years This book is written for the general reader containing humor and eliminating jargon whenever possible and will also be of interest to scientists The hunt for the tachyon will fascinate all readers who approach the study of physics with curious and open minds      *Encyclopedia of Evolutionary Biology*, 2016-04-14 Encyclopedia of Evolutionary Biology Four Volume Set is the definitive go to reference in the field of evolutionary biology It provides a fully comprehensive review of the field in an easy to search structure Under the collective leadership of fifteen distinguished section editors it is comprised of articles written by leading experts in the field providing a full review of the current status of each topic The articles are up to date and fully illustrated with in text references that allow readers to easily access primary literature While all entries are authoritative and valuable to those with advanced understanding of evolutionary biology they are also intended to be accessible to both advanced undergraduate and graduate students Broad topics include the history of evolutionary biology population genetics quantitative genetics speciation life history evolution evolution of sex and mating systems evolutionary biogeography evolutionary developmental biology molecular and genome evolution coevolution phylogenetic methods microbial evolution diversification of plants and fungi diversification of animals and applied evolution Presents fully comprehensive content allowing easy access to fundamental information and links to primary research Contains concise articles by leading experts in the field that ensures current coverage of each topic Provides ancillary learning tools like tables illustrations and multimedia features to assist with the comprehension process      **Sourcebook for Sundays, Seasons, and Weekdays 2012** Liturgy Training Publications, 2011-03-28      **The Biology of Moulting in Birds** Lukas Jenni, Raffael Winkler, 2020-09-17 The first comprehensive review of all aspects of the biology of moulting drawing information from across the literature and in all birds from penguins to passerines Feathers are amazing structures unique to birds and for a variety of reasons they need to be renewed periodically as a whole in a process called moulting During this process all of the functions of plumage are impaired and most aspects of a bird's life are affected Every moulting determines a bird's appearance anew and restores plumage efficacy for flight and insulation Moulting profoundly affects physiology and the organization of the annual cycle and it constrains reproduction and migration Given these major impacts which are equal to

the other annual challenges of reproduction and migration it is surprising that research on moult has largely been so neglected a subject Lukas Jenni and Raffael Winkler have brought together the widely scattered results of studies on the processes and consequences of moult in birds This book opens with an overview of the functions of plumage and of feather maintenance and feather wear and then introduces the two functions of moult replacement of worn feathers and adjustment of plumage characteristics and appearance The body of the book then examines feather growth and the physiology energetics and control of moult and how various other physiological processes interact with moult and may compensate for its costs Significantly the authors explain how variations in moult and feather quality affect a bird s overall plumage quality and they highlight the resulting consequences in terms of physical performance appearance and signalling Finally there is a review of all the various solutions that birds have developed to fit moult into the annual cycle This long awaited book covers for the first time all aspects of the biology of moult and fills an important gap in the literature completing our understanding of how the most important annual events in a bird s life fit together into a coherent whole It draws on a wide range of information from penguins to small passerines from raptors to wildfowl to highlight the variety of the subject and to pinpoint the many gaps in our knowledge along with avenues for fruitful further research

**What is Orientation?** Werner

Stegmaier,2019-08-19 The very first thing one does in all situations of life is orient oneself Decisions of orientation which are mostly made under uncertainty and the pressure of time largely determine subsequent decisions But what is orientation The problems of orientation are as old as humankind the word is used everywhere but the concept has never been thoroughly investigated The philosopher Werner Stegmaier comprehensively clarifies for the first time the conditions and structures of orientation including those of our sexual economic media political legal scientific artistic religious moral and ethical orientations He thereby establishes a new philosophical language and offers a philosophy for our time As if I unexpectedly slipped down into a deep vortex I am swirled around in a way that I can neither put a foot down nor swim to the surface Nonetheless I will work my way out Ren Descartes Philosopher As often as my speculation seems to lead me too far from the paved road of common sense I stand still and seek to orient myself I look back at the point from which we started and I seek to compare the two guideposts I have Moses Mendelssohn Philosopher A philosophical problem has the form I do not know my way about Ludwig Wittgenstein Philosopher The second O orientation as the repository of our genetic heritage cultural tradition and previous experiences is the most important part of the O O D A loop since it shapes the way we observe the way we decide the way we act John Boyd Military Strategist
