Modern Plantation In The Third World:

The Modern Plantation in the Third World Edgar Graham, Ingrid Floering, 2024-02-01 Originally published in 1984 this was the first study to define and rationalise the character and functions of the plantation in the contemporary world The author Edgar Graham was uniquely placed to do this having had long experience of Unilever's plantations in West Africa Zaire Malaysia and the Pacific Writing as a pragmatist from observed fact his starting point was the fact that the modern plantation bears very little resemblance to that of the past on which most hostile accounts are still based Two changes altered the very nature of the issue First the 20th Century plantation existed within an economic framework controlled by independent governments Secondly the rapid development in technology has revolutionised most aspects of plantation production The result it is argued is that the modern plantation offers host governments the option of using this as the most efficient way of utilising available factors of production to provide a maximum social return Exemplified by case studies this study presents a powerful argument for the continue use of the plantation system when properly applied to a variety of tropical crops

Unfolding Crisis in Assam's Tea Plantations Deepak K. Mishra,Vandana Upadhyay,Atul Sarma,2014-03-21 As the Indian economy integrates into global circuits of production exchange and accumulation the burdens of adjustment are shared unequally by different sectors classes and regions This study unravels the livelihood strategies and living conditions of labour in the tea gardens of Assam The tea sector has been undergoing a crisis since the 1990s with stagnant production decline in exports and closures of many tea gardens leading to large scale retrenchments in the labour force Based on a detailed analysis of secondary data and primary field research the study examines the extent types and implications of inter generational occupational mobility or immobility among tea garden labourers in Assam In the process it reflects on how even a sector that had brought capital and labour from outside and contributed significantly to the country s export earnings failed to create dynamic growth linkages within the local economy The experience of the labour force in the Assam tea sector the authors argue is important for making sense not only of the development dynamics of the region but of the contradictory ways in which forces of globalisation and neo liberal reforms have been reshaping the worlds of labourers in the margins The book will be of interest to students and scholars of labour studies development studies management studies and studies of north east India as well as to policy makers and those in the tea industry

Natural resources alone will not create socio economic prosperity void of good management with a clear development vision and strategy in Cameroon. The book assembles a wide diversity of analysis views perspectives and recommendations from economists development experts social and political scientists on Cameroon's current development inertia. What emerges in the end is a coherent interdisciplinary analysis of the natural resource development paradox as it plays out in an African setting. During the Industrial Revolution British merchants established overseas branches which became major trade intermediaries and subsequently engaged in foreign direct investment. Complex multinational business groups emerged controlling large

investments in natural resources processing and services in Asia Latin America and Africa While theories of the firm predict the demise over time of merchant firms this book identifies the continued resilience of British trading companies despite the changing political and business environments of the twentieth century Like Japanese trading companies they re invented themselves in successive generations The competences of the trading companies resided in their information gathering relationship building human resource and corporate governance systems This book provides a new dimension to the literature on international business through the focus on multinational service firms and its evolutionary approach based on confidential business records

Slaves, Peasants, and Rebels Stuart B. Schwartz, 1996 Once preoccupied with Brazilian slavery as an economic system historians shifted their attention to examine the nature of life and community among enslaved people Stuart B Schwartz looks at this change while explaining why historians must continue to place their ethnographic approach in the context of enslavement as an oppressive social and economic system Schwartz demonstrates the complexity of the system by reconsidering work resistance kinship and relations between enslaved persons and peasants As he shows enslaved people played a role in shaping not only their lives but Brazil s institutionalized system of slavery by using their own actions and attitudes to place limits on slaveholders A bold analysis of changing ideas in the field *Slaves Peasants and Rebels* provides insights on how the shifting power relationship between enslaved people and slaveholders reshaped the contours of Brazilian society
