Ideas, Interests and the Development of the European Banking Systems Florian Brugger, 2020-08-17 What are the grand dynamics that drive the history of economies The laws of supply demand most economists would argue For the history of European banking this book offers an alternative explanation Rather than market forces the coincidence and coalitions of charismatic ideas and powerful interests is what shaped banking in Europe In *Ideas Interests and the Development of the European Banking Systems* Florian Brugger traced decisive moments in the history of the European Banking Sector from the time of the Italian City States to the post World War I period he shows how coalitions of ideas and interests built the tracks along which the European Banking Sector developed Inspired by Max Weber he argues that economic organizations and institutions like the Banking Sector are embedded into three fundamental orders the economic the cultural and the political order Enforced and institutionalized by vested interests ideas of the cultural order legitimate

and empower interests of the economic and political order What is more decisive moments were frequently characterized by coalitions of ideas and interests between parties that in normal times had nothing in common or were even confronting each other in a hostile way

Chinese Modernity and the Peasant Path Kathy Le Mons Walker, 1999 This ambitious work traces a social history of semicolonialism in late nineteenth and early twentieth century China It takes as its central concern the intertwining of two antagonistic forces elite constructions of modernity shaped globally and an alternate line of peasant resistance and development Nantong county and the northern portion of the commercially advanced Yangzi Delta form its focal points Lying in the hinterland of and connected in myriad ways with the treaty port of Shanghai which in the late nineteenth century became the center of imperialist activity in China the northern delta is an ideal locale for examining how the acquisition transmission and contestation of power may have changed during the extended moment of semicolonial encounter The author's specific project is to unravel the multiple strands of the semicolonial process and thereby the dominant and alternative histories it embodied In emphasizing semicolonialism as a structural context shaping events the book opens up a pivotal but silent area in the history of modern China In confronting the development of capitalism as a historical phenomenon and suggesting that its consequences for land and labor on a global scale need greater theoretical and historical scrutiny the book forces a new understanding of China's modernity The book is in two parts The first delineates key long term dynamics in the political economic and social history of the area from the late Ming dynasty to the Opium Wars The second part begins with an examination of the rise of modernist urban power in the context of accelerating growth in the textile and cotton trades focusing on such topics as economic restructuring under Shanghai's impetus new forms of economic and political organization and contention as well as cooperation within the urban elite Turning to the countryside the book then examines the regearing of the rural economy to the needs of urban capital local and global outlines the emergence of modern landlordism and other rural capitalisms analyzes class formation in the peasantry associated with changes in labor organization tenurial arrangements and the gendered division of labor and traces the coalescence of a distinctive political discourse through which peasants contested certain development schemes and advanced alternative conceptions of community and nation

A Crash Course on Crises Markus K. Brunnermeier, Ricardo Reis, 2025-05-20 An incisive overview of the macroeconomics of financial crises essential reading for students and policy experts alike With alarming frequency modern economies go through macro financial crashes that arise from the financial sector and spread to the broader economy inflicting deep and prolonged recessions A Crash Course on Crises brings together the latest cutting edge economic research to identify the seeds of these crashes reveal their triggers and consequences and explain what policymakers can do about them Each of the book's ten self contained chapters introduces readers to a key economic force and provides case studies that illustrate how that force was dominant Markus Brunnermeier and Ricardo Reis show how the run up phase of a crisis often occurs in ways that are preventable but that may go unnoticed and discuss how

debt contracts banks and a search for safety can act as triggers and amplifiers that drive the economy to crash Brunnermeier and Reis then explain how monetary fiscal and exchange rate policies can respond to crises and prevent them from becoming persistent With case studies ranging from Chile in the 1970s to the COVID 19 pandemic *A Crash Course on Crises* synthesizes a vast literature into ten simple accessible ideas and illuminates these concepts using novel diagrams and a clear analytical framework **Principles of Money and Banking** , *The Chinese Banking Industry* Yuanyuan

Peng,2007-08-18 Bringing a vast amount of material to a Western audience for the first time this book provides a detailed systematic micro level analysis of the historical development of the Chinese banking industry analyzing the key issues in the development of the Bank of China in the period 1905 to 1949 Trade Promotion Series ,1925 **The interest rate risk**

of banks Max Teichert,2018-02-28 This book produces three main results First the interest rate risk from on balance sheet term transformation of banks in Germany exceeds the euro area average and is bound to increase even further Within Germany savings banks and cooperative banks are particularly engaged Second supervisory interest rate shock scenarios are found to be increasingly detached both from the historic and the forecasted development of interest rates in Germany This increasingly limits the informative content of mere exposure measures such as the Basel interest rate coefficient when used as risk measures Third there is a reasonable theoretical rationale and there is strong empirical evidence for banks search for yield in interest rate risk i e a negative link between the term spread and the taking of interest rate risk by banks There is even a threshold of income below which banks search for yield in interest rate risk surfaces openly *Reading Shenbao* W. Tsai,2009-11-30 Through a study of the readership of the most popular commercial daily newspaper in China during the early twentieth century *Reading Shenbao* investigates ideas of nationalism consumerism and individuality looking at the relationship between advertising modern lifestyles and changing social attitudes in China as it underwent modernization
