Jeffrey A. Larsen, James M. Smith

Nuclear Non Proliferation Towards An Agenda For The 1990s:

Nuclear Non-Proliferation John Simpson, 1987-11-12 Originally published in 1987 this book is concerned with the possible acquisition of nuclear weapons by states not in possession of them and the international concern caused by this Since 1968 the international arrangements designed to prevent this had been based upon the Nuclear Non Proliferations Treaty which had over 130 states as signatories at the time of publication The initial period of application of this treaty ended in 1995 and a conference was held then to discuss its extension This volume was the first public attempt to explore the problems surrounding this conference to examine issues likely to determine its outcome and to analyse the consequences if the conference were to fail to reach any agreement on extension The international contributors were among the foremost students and practitioners in the area and brought unique knowledge and experience to the subject The result was a pathbreaking attempt to investigate a critical problem for international security in the 1990s and to identify methods whereby international nuclear non proliferation arrangements could be extended into the next century UK Arms Control in the 1990s Mark Hoffman, 1990 Historical Dictionary of Arms Control and Disarmament Jeffrey A. Larsen, James M. Smith, 2005-03-25 Historical Dictionary of Arms Control and Disarmament provides a historical review of key themes and issues in international security and arms control focusing on efforts in the 20th century to control the spread and use of armaments and to prevent war This book summarizes the rich and proud traditions of arms control and disarmament their critical role in ensuring a non catastrophic course throughout history especially the dangerous period of the Cold War and their continuing relevance and role in the emerging post Cold War world It also seeks to reinforce a broad perspective of key terms in order to capture the scope and range of their application yesterday today and tomorrow Given this combined tradition and focus this Dictionary serves two purposes As a historical dictionary it chronicles key terms personalities events and agreements as a ready reference from which to launch a more extensive investigation But it also seeks to capture the breadth of current and future applications by presenting the vocabulary of traditional and non traditional approaches The book includes a large dictionary of more than 1 000 key terms as well as a comprehensive bibliography divided into multiple categories an extensive chronology and a timeline This book can also serve as a useful desk reference for the policy practitioner The pace and intensity of the practice of arms control often eliminates the luxury of conventional study of past or related arms control efforts The dictionary seeks to provide a relevant sampling of treaty and agreement details and of the specific terms of reference of arms control to allow productive progress in a policy work environment Researchers and students will also find the dictionary to be a useful reference tool Much of the formal literature in the field such as treaty texts and policy pronouncements is written in technical language without elaboration Also many references to agreements are posed in shorthand intended only for the policy practitioner **Networked Nonproliferation** Michal Onderco, 2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The

majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty was extended indefinitely and without a vote Networked Nonproliferation offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With Networked Nonproliferation Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power
