Nuclear Weapons And Security:

The Long Shadow Muthiah Alagappa, 2008 The Long Shadow investigates the purposes and roles of nuclear weapons in the new security environment the nature and content of the national nuclear strategies of relevant states and their implications for international security and stability in the Asian security region Nuclear Weapons And Security Jonathan E Medalia, Paul Zinsmeister, Robert Civiak, 1991-05-12 Worldwide interest in banning nuclear weapon tests which began in the 1950s led to the Nuclear Test Ban Treaty of 1963 and to the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty of the 1970s This study presents the major aspects and viewpoints of the test ban debate **Nuclear Security** Michael Nacht, Michael Frank, Stanley Prussin, 2021-11-19 This textbook is the first comprehensive and systematic account of the science technology and policy issues associated with nuclear energy and nuclear weapons Throughout their account of the evolution of nuclear policy from its origin to the early Trump presidency the authors interweave clear technical expositions of the science and technology that underpin and constrain it The book begins by tracing the early work in atomic physics the discovery of fission and the developments that led to the Manhattan Project and the delivery of atomic bombs against Japan that ended World War II It follows the initial failed attempts at nuclear disarmament the onset of the Cold War nuclear arms competition and the development of light water reactors to harness nuclear energy for electric power generation The authors thoroughly unpack the problem of nuclear proliferation examining the strategy and incentives for states that have and have not pursued nuclear weapons and providing an overview of the nuclear arsenals of the current nuclear weapon states They trace the technical political and strategic evolution of deterrence arms control and disarmament policies from the first attempts for an Outer Space Treaty in 1957 through the new START treaty of 2009 At critical junctures in the narrative the authors explain the relevant nuclear science and technology including nuclear fission and criticality nuclear materials and enrichment nuclear detonation and nuclear weapons effects nuclear weapons stockpile constraints stewardship and surveillance nuclear fusion and thermonuclear weapons technologies for monitoring verification and proliferation and nuclear forensics They conclude with an assessment of contemporary issues ranging from the Joint Comprehensive Plan of Action reached to halt Iran's nuclear weapons development program to the threat of nuclear terrorism the perceived nuclear weapons policies of Russia and China and the US efforts to provide disincentives for its allies to acquire their own nuclear weapons by maintaining credible security guarantees Nuclear Weapons Security Crises Henry D. Sokolski, Bruno Tertrais, 2013 At the height of the Cultural Revolution a Chinese long range nuclear missile is fired within the country and the nuclear warhead it is carrying detonates A French nuclear device is exploded in Algeria during a coup there The Soviet empire has collapsed and shots are fired at a Russian crowd intent on rushing a nuclear weapons laden plane straining to remove a stash of nuclear weapons to a safer locale Pakistani civilian governments are routinely pushed aside by a powerful nuclear armed military that observers worry might yet itself fall prey to a faction willing to seize a

portion of Pakistan's nuclear arsenal This volume reveals previously unknown details on each case and teases out what is to be learned This book is ideal not only for policymakers and analysts but for historians and teachers as well **Security Without Nuclear Weapons?** Stockholm International Peace Research Institute,1992 This book examines the question Is the elimination of nuclear weapons feasible Individual chapters address the major conceptual technical and economic issues in the design of a non nuclear security regime Other chapters explore more specialized issues as they relate to the feasibility of the elimination of nuclear weapons elite perceptions and the decision making process verification nuclear proliferation fissile materials and warheads alliance and regional hegemonies and deterrence Nuclear Weapons and Security ,1989

Understanding and Managing Risk in Security Systems for the DOE Nuclear Weapons Complex National Research Council,Division on Earth and Life Studies,Nuclear and Radiation Studies Board,Committee on Risk-Based Approaches for Securing the DOE Nuclear Weapons Complex,2011-04-07 A nuclear weapon or a significant quantity of special nuclear material SNM would be of great value to a terrorist or other adversary It might have particular value if acquired from a U S facility in addition to acquiring a highly destructive tool the adversary would demonstrate an inability of the United States to protect its nuclear assets The United States expends considerable resources toward maintaining effective security at facilities that house its nuclear assets However particularly in a budget constrained environment it is essential that these assets are also secured efficiently meaning at reasonable cost and imposing minimal burdens on the primary missions of the organizations that operate U S nuclear facilities It is in this context that the U S Congress directed the National Nuclear Security Administration NNSA a semi autonomous agency in the U S Department of Energy DOE responsible for securing nuclear weapons and significant quantities of SNM asked the National Academies for advice on augmenting its security approach particularly on the applicability of quantitative and other risk based approaches for securing its facilities In carrying out its charge the committee has focused on what actions NNSA could take to make its security approach more effective and efficient The committee concluded that the solution to balancing cost security and operations at facilities in the nuclear weapons complex is not to assess security risks more quantitatively or more precisely This is primarily because there is no comprehensive analytical basis for defining the attack strategies that a malicious creative and deliberate adversary might employ or the probabilities associated with them However using structured thinking processes and techniques to characterize security risk could improve NNSA's understanding of security vulnerabilities and guide more effective resource allocation *Nuclear Weapons and International Security* Ramesh Thakur,2015-02-11 This volume brings together more than three decades of research and writings by Professor Ramesh Thakur on the challenges posed by nuclear weapons Following an introduction to the current nuclear state of play the book addresses the challenge of nuclear weapons in three parts Part I describes the scholar practitioner interface in trying to come to grips with this challenge the main policy impact on security strategy and the various future nuclear scenarios Part II addresses regional

nuclear challenges from the South Pacific to East South and West Asia and thereby highlights serious deficiencies in the normative architecture of the nuclear arms control and disarmament regime In the third and final part the chapters discuss regional nuclear weapon free zones NPT anomalies and their implications for the future of the nuclear arms control regime and finally assess the global governance architecture of nuclear security in light of the three Nuclear Security Summits between 2010 and 2014 The concluding chapter argues for moving towards a world of progressively reduced nuclear weapons in numbers reduced salience of nuclear weapons in national security doctrines and deployments and ultimately a denuclearized world This book will be of much interest to students of nuclear proliferation global governance international organisations diplomacy and security studies Arms Control, Disarmament, and National Security Donald G.
