Poison And Medicine:

Poison, Medicine, and Disease in Late Medieval and Early Modern Europe Frederick W Gibbs, 2018-07-20 This book presents a uniquely broad and pioneering history of premodern toxicology by exploring how late medieval and early modern c 1200 1600 physicians discussed the relationship between poison medicine and disease Drawing from a wide range of medical and natural philosophical texts with an emphasis on treatises that focused on poison pharmacotherapeutics plague and the nature of disease this study brings to light premodern physicians debates about the potential existence nature and properties of a category of substance theoretically harmful to the human body in even the smallest amount Focusing on the category of poison *venenum* rather than on specific drugs reframes and remixes the standard histories of toxicology pharmacology and etiology as well as shows how these aspects of medicine although not yet formalized as independent disciplines interacted with and shaped one another Physicians argued for instance about what properties might distinguish poison from other substances how poison injured the human body the nature of poisonous bodies and the role of poison in spreading and to some extent defining disease The way physicians debated these questions shows that poison was far from an obvious and uncontested category of substance and their effort to understand it sheds new light on the relationship between natural philosophy and medicine in the late medieval and early modern periods *Poison, detection and the*

Victorian imagination Ian Burney, 2021-01-26 This fascinating book looks at the phenomenon of murder and poisoning in the nineteenth century Focusing on the case of William Palmer a medical doctor who in 1856 was convicted of murder by poisoning it examines how his case baffled toxicologists doctors detectives and judges The investigation commences with an overview of the practice of toxicology in the Victorian era and goes on to explore the demands imposed by legal testimony on scientific work to convict criminals In addressing Palmer s trial Burney focuses on the testimony of Alfred Swaine Taylor a leading expert on poisons and integrates the medical legal and literary evidence to make sense of the trial itself and the sinister place of poison in wider Victorian society Ian Burney has produced an exemplary work of cultural history mixing a keen understanding of the contemporary social and cultural landscape with the scientific and medical history of the period

It All Depends on the Dose Ole Peter Grell, Andrew Cunningham, Jon Arrizabalaga, 2018-05-11 This is the first volume to take a broad historical sweep of the close relation between medicines and poisons in the Western tradition and their interconnectedness They are like two ends of a spectrum for the same natural material can be medicine or poison depending on the dose and poisons can be transformed into medicines while medicines can turn out to be poisons The book looks at important moments in the history of the relationship between poisons and medicines in European history from Roman times with the Greek physician Galen through the Renaissance and the maverick physician Paracelsus to the present when poisons are actively being turned into beneficial medicines Chapter 5 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4

Making Kedjom Medicine Kent Maynard,2004-02-11 Conceptions of medicine and medical practice among the Kedjom peoples in Cameroon embrace more than western biomedical understandings of medicine For these peoples medicine implies substances knowledge practices and institutions bound up with protection and intervention against misfortune and the active promotion of well being Nor are medical concerns primarily about the individual Medicine in the precolonial era was a matter for groups In short medicine was preeminently public Perhaps the major transformation since the colonial period and extending into the postcolonial has been the increasing commercialization of traditional medicine as African healers shift their practices away from group concerns to a focus more concerned with treating the individual Written in a lucid style full of vibrant anecdotes Maynard s book will appeal not only to medical anthropologists and development workers but also to anyone interested in nonwestern medicine and practices

The Criminal Code of Ohio ... Ohio,1878 **The Poison Trials** Alisha Rankin,2021-01-22 In 1524 Pope Clement VII gave two condemned criminals to his physician to test a promising new antidote After each convict ate a marzipan cake poisoned with deadly aconite one of them received the antidote and lived the other died in agony In sixteenth century Europe this and more than a dozen other accounts of poison trials were committed to writing Alisha Rankin tells their little known story At a time when poison was widely feared the urgent need for effective cures provoked intense excitement about new drugs As doctors created performed and evaluated poison trials they devoted careful attention to method wrote detailed experimental reports and engaged with the problem of using human subjects for fatal tests In reconstructing this history Rankin reveals how the antidote trials generated extensive engagement with experimental thinking long before the great experimental boom of the seventeenth century and investigates how competition with lower class healers spurred on this trend The Poison Trials sheds welcome and timely light on the intertwined nature of medical innovations professional rivalries and political power
