Poison Politics Are Negative Campaigns Destroying Democracy:

Poison Politics Victor Kamber, 1997-08-21 Every campaign season more trash talk and attack ads dominate the airwaves and more voters subsequently turn off to politics Why do so many races degenerate into name calling and negativism What is the effect on our democracy our ability to make the right political and policy choices **Poison Politics Are Negative Campaigns Destroying Democracy** tackles these vital questions **The Psychology of Attack Politics** Alessandro Nai, Lukas P.

Otto, Chiara Vargiu, 2025-07-25 **The Psychology of Attack Politics** explores the use of political attacks in election campaigns and the way in which their often deliberate use impacts voters and has wide reaching societal consequences With most elections being fraught with tension disrespectful treatment of political opponents and political incivility this timely book aims to disentangle the dynamics of how attack politics is perceived e g whether citizens perceive a negative message to be indeed negative and evaluated i e whether citizens like or dislike attack politics The book also looks at the effects of attack politics for instance whether exposure to negative or uncivil messages alters attitudes and behaviors such as turnout affective polarization and support for political violence The authors provide a systematic conceptualization of attack politics made up of negativity incivility and intolerance Focusing on cutting edge research in political psychology political communication and electoral behavior the authors make the central argument that to understand the effects of different forms of attack politics there should be a strong focus on individual differences in message perception and evaluation Exploring what ultimately drives the effects of negative uncivil and intolerant rhetoric and analyzing the phenomena at the center of current scientific and public discourse this is a fascinating reading for academics and students in psychology political science sociology and communication as well as anyone interested in political campaigning and elections **Going**

Dirty David Mark, 2007-03-09 **Going Dirty** is a history of negative campaigning in American politics and an examination of how candidates and political consultants have employed this often controversial technique The book includes case studies on notable races throughout the television era in which new negative campaign strategies were introduced or existing tactics were refined and amplified upon Strategies have included labeling opponents from non traditional political backgrounds as dumb or lightweight an approach that got upended when a veteran actor and rookie candidate named Ronald Reagan won the California governorship in 1966 setting him on a path to the White House The negative tone of campaigns has also been ratcheted up dramatically since the terrorist attacks of September 11 2001 Campaign commercials now routinely run pictures of international villains and suggest sometimes overtly at other times more subtly that political opponents are less than resolute in prosecuting the war on terror The book also outlines a series of races in which negative campaigning has backfired because the charges were not credible or the candidate on the attack did not understand the political sentiments of the local electorate they were trying to persuade The effect of newer technologies on negative campaigning is also examined including blogs and Web video in addition to tried and true methods like direct mail **Out of the Running** Shauna

Shames,2018-07-03 An inside look into why Millennials are rejecting careers in politics and what this means for the future of America's political system Millennials are often publically criticized for being apathetic about the American political process and their lack of interest in political careers But what do millennials themselves have to say about the prospect of holding political office Are they as uninterested in political issues and the future of the American political system as the media suggests Out of the Running goes directly to the source and draws from extensive research including over 50 interviews with graduate students in elite institutions that have historically been a direct link for their graduates into state or federal elected office Harvard Law Harvard's Kennedy School of Government and Boston's Suffolk University Law School Shauna Shames herself a young graduate of Harvard University suggests that millennials are not uninterested rather they don't believe that a career in politics is the best way to create change Millennials view the system as corrupt or inefficient and are particularly skeptical about the fundraising frenzied media attention and loss of privacy that have become staples of the American electoral process They are clear about their desire to make a difference in the world but feel that the broken political system is not the best way to do so a belief held particularly by millennial women and women of color The implications of Shames argument are crucial for the future of the American political system how can a system adapt and grow if qualified intelligent leaders are not involved An engaging and accessible resource for anyone who follows American politics Out of the Running highlights the urgent need to fix the American political system as an absence of diverse millennial candidates leaves its future in a truly precarious position
