The book is organized into three sections including 20 new chapters and new topics such as grapes and raisins, lilies, Christmas time plants, mercury and accidental poisoning in non traditional pets. New two color design makes the book more esthetically pleasing and allows for quick retrieval of information. Toxic Plant Information Summary tables make treatments for plant intoxications easy to find. Toxic Plant Quick Reference Based on Clinical Signs tables are included to support small animal veterinarians in cases of potential toxic plant ingestion. Summary charts at the beginning of each chapter in the Specific Toxicants section contain bulleted lists with clear cut information on the specific toxicant, the clinical signs and prognosis. A comprehensive review of all known potentially toxic substances is provided from A acetaminophen to Z zinc, including the very latest on grape and raisin toxicity, making this the most up to date and thorough text in this field. 45 different experts contribute to this book, all from the field of veterinary toxicology and medicine. 20 new chapters have been added.
