Pokhran II:

India's Nuclear Fuel Cycle Taraknath V.K. Woddi, William S. Charlton, Paul Nelson, 2022-06-01 An analysis of the current February 2009 status and future potential of India's nuclear fuel cycle is presented in this book. Such a fuel cycle assessment is important but relatively opaque because India regards various aspects of its nuclear fuel cycle as strategically sensitive. Any study therefore necessarily depends upon reverse calculations based on the information that is available: expert assessments, engineering judgment, and anecdotal information. In this work, every effort is made to provide transparency to these foundations so that changes can be made in light of alternative expectations or subsequent information. This book should be of interest to policy experts, governmental specialists, technologists, nuclear technologists, and others seeking to understand and explain the associated facts and potential consequences of the recent U.S.-India civil nuclear accord. Table of Contents: Introduction, A Brief History of the Indian Nuclear Program, Indian Nuclear Facilities, Fuel Cycle Analysis From Beginning to Present Day, Fuel Cycle Analysis, Future Projections, Alternate Reactor Systems, Conclusions, Acknowledgements.

South Asia in 2020 Michael R. Chambers, 2002 *India's Nuclear Bomb* George Perkovich, 1999 Publisher: Fact Sheet. The definitive history of India's long flirtation with nuclear capability culminating in the nuclear tests that surprised the world in May 1998.

Nuclear India in the Twenty-First Century D. SarDesai, R. Thomas, 2002-05-02 This collection of essays, unlike other books on this subject, emphasizes strategic, technological, and economic factors. It includes contributions from a combination of academics and governmental experts from both the United States and India. Nuclear India in the Twenty-First Century provides an important picture of India's nuclear intentions and capabilities and should facilitate policies that the US may consider in response to regional and global proliferation.

The Making of India's Foreign Policy Jayantanuja Bandyopadhyaya, 2003 Indo-Russian Military and Nuclear Cooperation Jerome M. Conley, 2001-01-01 In this book, Jerome M. Conley argues that strained Indo-American relations stem from a deep nexus of historical factors. Conley begins his examination of the delicate balance of power in the region by looking back to the Moscow-New Delhi deal during the Cold War. He argues that the dialogue between the United States, India, and Russia that was established during this era has persisted only because of American ambivalence, short-term Indian needs, and Russian economic trends.

Consequently, the United States must sow the seeds for long-term trust and cooperation with India to ensure limited and controlled nuclear expansion. This book will appeal to international affairs and security studies scholars, foreign policy historians, and anyone interested in exploring the complexities of regional strategic arms control. , *Subcontinental Drift* Rajesh Basrur, 2023 This book explains why India's foreign policy is often characterized by multiple hesitations, delays, and diversions. Rajesh Basrur finds that India's foreign policy is hampered by significant domestic political constraints which dim the country's prospects for major power status. Basrur uses the concept of policy drift and the international relations theory known as neoclassical realism to illuminate the main types of political stumbling blocks. The four cases explored in this

book demonstrate that there are two basic types of explanation for India's indecision on crucial issues. He distinguishes between involuntary drift which is related to the distribution of domestic material power and voluntary drift which is produced by a responsibility deficit. Basrur's two case studies of involuntary drift are the India-US nuclear agreement and Indian security policy toward Sri Lanka. Two other case studies on India's nuclear strategy and India's policy on cross border terrorism demonstrate voluntary drift. Basrur concludes India's capacity to implement vital policies is under question not only because of the specific negativities associated with the cases examined here but more generally from what they indicate about the ability of the Indian state to surmount domestic obstacles in pursuit of its interests as a potential major power.

Prisoners of the Nuclear Dream M. V. Ramana, C. Rammanohar Reddy, 2003. In this book some of South Asia's best minds address questions on the political, scientific, strategic, economic and environmental aspects of India's decision to proceed with the nuclear weapons programme. The contributors include Kanti Bajpai, Admiral L. Ramdas, Amartya Sen, Amulya Reddy and Jean Dreze. While much has been said in India in defense of the nuclear tests of 1998, there is also a strong body of opinion which questions India's decision to become a nuclear weapon state. The essays in this book are representative of this critique. They have been written for the general reader concerned about the important issue of the production of weapons of mass destruction in South Asia.

Nuclear Weapons and India's National Security M. L. Sondhi, 2000. This book covers a wide range of subjects from fundamentalism and terrorism to regional and international security, China's contribution to nuclear and missile proliferation and bargaining asymmetries between India and China.
